Suggestions to our Customers

With each order write your NAME, POST OFFICE, COUNTY, and STATE in full. When Freight Office is different from Post Office, give both.

Send money with order, by P. O. Order, Registered Letter, Express Order, or Draft on Cincinnati or New York.

In view of the fact that the Express companies provide special Low Rates on our shipments we would respectfully suggest that patrons remit by Express Money Orders, which can be obtained at nearly all Express Offices in the United States and Canada.

We do not send goods C. O. D., as everything is plainly priced, and the return charges on the money is an unnecessary expense.

Will be glad to send copies of this or our other Catalogues to your friends, if you will send list of names and addresses.

From those receiving our Catalogue for the first time we solicit a trial order, and whether it is large or small, it shall receive the same prompt and careful attention that we give to orders from regular customers.

About Warranting Seeds.—We have often been asked if we “guarantee or warrant our Seeds.” We beg to state plainly, we do not, for the reason that practical experience has assured us of the fact that crops may fail, no matter how fresh or pure the seed sown may be. We trust that our customers will fully realize that it is to our interest to send none but the best quality of Seeds. It would be folly to do otherwise, unless we wanted to sacrifice our good reputation for selling Reliable Seeds, which we are constantly striving to extend.

To secure success, however, it is necessary that the customer should do his part well, or our good seeds will be ruined. With the best of management and with good seeds there will be an occasional unaccountable failure. The best of gardeners sometimes fail, and try again with the same seed with good results.

WE TEST ALL OUR SEEDS before sending them out, and while we exercise the greatest care to have all seeds pure and reliable, we give no warranty, express or implied, as to description, quality, productiveness, or any other matter, of any seeds we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the seeds on these terms they are at once to be returned, and the money that has been paid for same will be refunded.

Respectfully,

J. Chauncey Luck, Seedsman.

Some of the ‘Good Things’
FOR A LAWN.
Emerald or JMC City Park Grass Seed

We have made the subject of lawns a study for many years and this mixture has been prepared and sold by us in all parts of the country, giving general satisfaction.

In making a lawn great care should be taken to use only the very best quality of pure lawn seed so as to produce a soft, velvety, and moss sod, that will withstand cutting and heat of summer, and the severe cold of winter. It is not made of annual grasses for a quick show, or of the chaffy, light weight seeds, sold by some seedsmen at cheap prices.

Our mixture is unsurpassed by any of the celebrated brands in this country.

A pound of our mixture will sow about 300 sq. ft. Quantity of seed required to sow an acre (43,660 sq. ft.) For new lawns, not less than four bushels; for renovating old lawns from one to two bushels. First Quality, per lb. 25c; 5 lbs. $1.00; 1 bu. (16 lbs.) $3.00

Our Lawn Grass Mixture for Shady Situations.—On nearly all lawns there are shaded, bare and unsightly spots on which the owners have difficulty in getting a stand of grass; for such places this mixture is adapted. It is composed of dwarf-growing grasses which are found naturally growing in such places. Should the ground have become "sour," or drainage defective, it is apt to be covered with moss. If such is the case apply Land Plaster or Wood Ashes to sweeten it, after first removing the moss, then rake thoroughly and sow the seed at the rate of not less than four bushels per acre.

Price—1 lb. 25c; 5 lbs. $1.00; bu. $3.00.

If to go by mail, add to the above prices 10c. per lb., for postage.

FERTILIZERS.
A Good Lawn Dressing is a Necessity.—You cannot produce a luxuriant and lasting growth of grass without a good dressing, and our dressing is the best. It is quick in action, goes directly to the roots, stimulates them to activity and causes the grass to thrive, a rich growth follows, which remains green and velvety all season. The dressing should be put on in winter or early spring, and sow broadcast on a damp day. Do not use stable manure or black soil from the barn yard, as either is sure to bring up a crop of weeds and grasses.

Our Lawn Dressing is perfectly odorless and while it cannot be seen five minutes after being put on, the effect on the grass can be seen all season.

Lawn Dressing, 10 lbs. 40c; 30 lbs. $1.00; 50 lbs. $1.50; 100 lbs. $2.50.

Unleached Hardwood Ashes effectually destroys grubs and worms and moss, also sweetens the ground. Send for descriptive circular.

Price—50 lbs. 75c; 100 lbs. $1.05; 200 lbs. $2.00.

LAND PLASTER.
Applied as a top dressing for grass and clover crops in the spring increases the growth and yield of same very largely. It is also of decided benefit to use when planting potatoes, in connection with fertilizer or manure, and its liberal use in stable, cattle stalls, poultry houses and on manure piles will prevent escape of ammonia, increasing the value of the farm manure amazingly. Its great usefulness, cheapness and effectiveness should make it universally and liberally used on every farm.

Price—10 lbs. 25c; 100 lbs. 90c. Special prices quoted on large lots.

FERTILIZER SALT.
Fine for dressing asparagus beds and fertilizing. Price—10 lbs. 25c; 20 lb. bag $1.50; per ton $12.00.

All Prices F. O. B. Cincinnati, and Subject to Market Changes.
FLOWER SEEDS.

SWEET PEAS.

A Superb Collection Including Best Up-to-Date Kinds.

In rearranging our Sweet Pea list this season, after making thorough tests on our extensive trial grounds, and consulting the opinions of well-known Sweet Pea Specialists, we have discarded some older varieties, inserting such of the new sorts and recent introductions as are worthy of our commendation, retaining only the best for general cultivation.

The following varieties selected with the view to please the most critical, and grouped for the convenience of customers according to their various shades and colors, we think, are the cream of the list.

HOW TO GROW—Plant early in rows North and South—March 1st is none too soon, if the ground will work. Make a trench 12 inches deep and 15 inches wide. Work into the soil in bottom of trench plenty of well rotted manure, fill 8 inches of trench with fine soil and sow the peas, cover one inch deep, in two rows 10 inches apart and seeds 2 inches apart in the rows; if planted later, cover deeper. When well up fill in with earth gradually as they grow until the trenches are full. The object is to get the roots well down so that they may resist drought. Give plenty of water, pick the blooms without stint, and do not let run to seed. Use brush or trellis 5 or 6 feet high.

Price—(Postpaid). Any separate variety—Pkt. 5c; oz. 10c; 1/4 lb. 20c; 1 lb. 65c. Any 6 pkts. 20c; any 15 pkts. 50c.

American—Striped.
Apple Blossom—Rose.
Blanche Burpee—White.
Butterfly—Pale gray.
Blanche Ferry—Pink and white.
Celestial—Azure blue.
Cardinal—Crimson scarlet.
Cupid—Dwarf white.
Captain of the Blues—Pale blue.
Emily Henderson—White.
Firefly—Deep scarlet.
Her Majesty—Rose.
Indigo King—Blue.
Icaria—Crimson.
Mrs. Eckford—Primrose yellow.
Queen of the Isles—White, red striped.
Red Riding Hood—Pink.
Rising Sun—Orange and rose.
Stanley—Dark maroon.
Venus—Salmon.
Captivation—Light claret.
Lottie Eckford—White, blended lavender.

SPECIAL OFFER—One ounce of each above Sweet Peas, 22 separate varieties, for $1.00.

J. C. McC’s—Named varieties, finest mixed, 10c oz.; 25c 1/4 lb.; 65c lb. Fine Mixed—10c oz.; 15c 1/4 lb.; 40c lb.

NASTURTIUMS. Climbing or Tall Mixture.

PLANT THESE IN QUANTITY. THEY WILL REPAY THE TROUBLE.

No garden is complete without a few of the gorgeous colored Nasturtiums—the dwarf sorts for beds or borders—the climbing ones to cover fences, trellis, banks, stumps of trees, or any unsightly places. No flowers so well repay the cultivator’s efforts, and none require so little to bring to perfection.

Our mixture this year has been improved by the addition of several new and distinct colors.

Price—1/4 lb. 35c; oz. 15c; large pkt. 10c.

NASTURTIUMS. Dwarf Mixture.

Made up in the same careful manner as the climbing, and presenting an even more varied range of colors. They should be sown in large quantities in the beds and borders. Nothing can give more satisfaction with so little trouble.

Price—1/4 lb. 35c; oz. 15c; large pkt. 10c.

PANSIES.

OUR PANSY SEED IS THE BEST TO BE OBTAINED.

This favorite flower is one of our specialties, and the following mixtures are secured from special Pansy Growers in the United States, England, France, Germany and elsewhere, regardless of cost. We do not hesitate to recommend them with the greatest of confidence to florists having the most critical trade. No one can offer better stock, although their prices may be higher. At the prices quoted we give liberal sized packets, according to the quality of the seed.

Bugnot, Cassier and Odier Strains—Superb mixture of unsurpassed quality, packet 25 cents.
J. C. McCulloch’s Mixture—Flowers very large and beautifully marked, plants neat and compact, packet 20 cents.
Choice Large Flowering—Mixed, splendid strain, packet 10 cents.
Fine Mixed—Large flowering, ounce $1.00; packet 5 cents.

For Full List of Flower Seeds see page 17.
RUST'S EGG PRODUCER.

You can get plenty of eggs at all seasons by using Rust's Egg Producer. It makes fowls vigorous and healthy, shortens the moulting period, prevents and cures leg weakness, etc., and is just what is needed to make poultry keeping the most profitable operation on a farm. You can feed Rust's Egg Producer every day for two or three weeks, at a cost of one cent for each hen and get surprising results.

1 lb. box 25c. If by mail, add 16 cents per lb. for postage.

RUST'S HAVEN'S' CLIMAX CONDITION POWDERS.

NO OWNER OF POULTRY OR STOCK SHOULD BE WITHOUT IT.

It cures diseases, and keeps stock and fowls healthy; the only real cure for gapes and fowl cholera, expels worms from horses, etc.; gives great and lasting benefit in heaves, without the slightest injury.

It makes hogs thrive and fatten; increases and improves the production of milk.

It contains no antimony, arsenic, rosin, or anything harmful, and is, therefore, entirely different from the number of quack foods and powders in the market.

It is an effective life destroyer.

It is not a food, but an honest medicine, at an honest price.

13 oz. package 25c. If sent by mail, 15 cts. extra for postage.

RUST'S HAVEN'S' Roup PILLS.

The pills act directly on the glands and mucous membrane, allay all tendency to fever, and carry off all morbid matter from the system. They are entirely free from everything harmful, and the best remedy ever discovered for Roup, Catarrh, Colds and Distemper. They are unlike any other medicine, and, being composed of medicines in concentrated form, they are of moderate size, and, therefore, easy to give to fowls.

25c per box of 48 pills.

MICA-CRYSTAL GRIT.

FOR POULTRY,
PIGEONS,
CHICKENS,
Ducks, Geese,
TURKEYS AND BIRDS.

Chemical analysis of Mica-Crystal Grit—shows that it contains all the elements essential to the good health and egg-producing qualities of the feathered tribe, namely: white quartz, digester, 58 per cent; aluminum, shell maker 20 per cent; iron, yolk maker, 12 per cent; magnesium, shell maker, 10 per cent.

Many tests have been made to demonstrate the worth of Mica Crystal Grit, and in every instance, no matter how small the particles were, remaining in the gizzard, they still retained their sharp cutting edges. The iron in Mica-Crystal Grit is practically all contained in the mica, and it is in its purest and best form. The effect of the iron in toning up the physical condition of your poultry, and the high yellow color produced in the yolk of the egg, is, of itself alone, worth more than all the other grits combined.

5 lbs. 10c; 100 lbs. 90c.

CHINA NEST EGGS.

3 cents each; 30 cents per dozen.

If by mail, 20 cents per dozen extra.

WE ARE HEADQUARTERS FOR

LUMP ROCK SALT

FOR STOCK.

Does not create thirst. Stock will do twenty per cent better wherever it is fed. Will go five times as far as common salt.

5 lbs. 10c; 100 lbs. $1.00; 500 lbs. $3.50.

Beautiful Flowering Bulbs.

GLADIOLUS.

The Gladiolus is of the earliest culture in any good garden soil, and may be planted from April to the middle of June. Set the bulbs four inches deep and eight or ten inches apart.

Mixed Shades. Each. Doz. 100
Scarlet ... 3c 20c $1.25
Pink ... 5c 40c 2.50
White ... 5c 50c 3.00
Yellow ... 5c 50c 3.00
Extra Choice 5c 25c 1.50
Fine Mixed . 3c 20c 1.25

BULBS by the 100 or 1000 sent by express or freight, purchaser to pay charges.

Write for special prices by the 1000.

New Excelsior Pearl Tuberose.

This is the best variety, and is a general favorite and the most popular of all flowers for a button-hole bouquet. Can be grown in pots or plant in open ground in May. The flowers of this variety are double the size of the common Tuberose, and are borne in great profusion. Of dwarf habit, perfectly double and of most delicious fragrance. No flower garden is complete without a few stalks.

Extra sized flowering bulbs 5 cents each, 3 for 10 cents, 30 cents per dozen, 100 for $1.50, 500 for $5.00.
MISCELLANEOUS.

LAWN MOWERS.

F. & N. Ball Bearing Lawn Mowers.

In the F. & N. Ball Bearing Lawn Mower is realized the culmination of the highest mechanical skill in lawn mower construction. No effort or expense has been spared to make this mower perfect in every respect. The material is the best that money can buy. Where two parts are joined together in this mower they are machined with the greatest care so that they will fit together with mathematical exactness. As a result there is no lost motion anywhere about the mower, it combines strength with lightness and is noiseless in operation. The mower is graceful in appearance and is highly finished. All wood parts are lacquered and highly polished, the handle decorations and name plate are of artistic transfers and the mower itself is finished in solid aluminum. This is a great protection against weather and makes it the handsomest mower ever placed on sale.

16 in. $8.00. 18 in. $9.00. 20 in. $10.00.

The F & N. Standard Lawn Mower.

Material—All of its material is carefully selected from the highest grades obtainable.
Cutting Blades—The cutting blades are spiral, and made of the best quality of crucible steel. There are four of these blades, giving a continuous shear cut and insuring a perfectly smooth lawn.
Adjustment—The adjustment is from the reel and not from the cutter bar. The cutter bar is therefore bolted firmly to the mower, binding its sides securely together and keeping its working parts in perfect position. The adjustment is controlled by means of a single screw on either side, and is the simplest and most accurate in use.
Gears—Are full standard, insuring the lightest possible draft in running.
Noisless Operation—The users find the F. & N. Standard practically noiseless in operation, which is the certain evidence of perfect workmanship and construction.

16 in. $4.50. 18 in. $5.50.

The Cyclone Seeder.

The Cyclone is a geared machine and works with a crank which seems to be the favorite; it is strongly built of the best material.
It sows Clover, Timothy, Millet, Flax, Wheat, Oats, Cora and all other seeds and grain, perfectly even and in any desired amount.
It has a four-inch clear throat and cannot be choked, even with strawy oats.
It will with proper care last a lifetime, only needs a trial to prove its superiority.

Price, $1.50.

The Indiana Broadcast Seed Sower.

THE ONLY STEEL AND REVERSIBLE SEED SOWER EVER INTRODUCED.

It will sow Wheat or Rye 50 feet at a round; Buckwheat 45 feet; Flax, Clover, Timothy and Millet 30 to 36 feet. It will sow Grass Seeds from 15 to 30 feet. Other seeds, etc., owing to their nature and condition.
By superior construction of the hopper and attachments of the sack, it sows out clean.

Price, $1.50.

The Acme Powder Gun.

DRY POWDER BLOWER—Price $1.00.
The Acme Powder Gun is the simplest tool ever made for applying poison to growing crops. It is entirely independent of water or plaster. No poison is left about the fields to kill stock. It requires no base of supplies; all you need to carry is a can of dry insecticide and the gun. Without stooping—the elbow does it—it applies any powdered poison on any plant in any desired quantity, any time of the day. The elbow may be detached if desired. This tool is well made of the best material, and is thoroughly guaranteed. The bellows sides are painted a bright vermillion, and the handles finished bright. The leather is a fine russet. We also furnish a spreader for distributing the blast.

The Acme Double Powder Gun.

NEWBERRY PATENT—Price $1.50.

This gun (or blower) is the highest development of the original Powder Gun idea. It is the invention of a practical farmer, familiar with a farmer's needs. It is but a little heavier than our "Acme," and will apply a continuous blast of dry poison to any plant. All parts of the Acme Double Powder Gun are thoroughly protected. There are no adjustments to make, no loose parts to get out of order. The material is the best. The Acme Double Powder Gun is finished in keeping with the original Acme and is furnished with the same detachable elbow and spreader.
SELECT LIST OF TESTED VEGETABLE SEEDS.
We catalogue all the leading varieties of vegetable seeds having merit

Highest Quality

FRESH SEEDS.

SEEDS POSTPAID BY MAIL.
We will send by mail, postage paid, any of the following list of vegetable and flower seeds; except peas, beans, corn and field seeds; for these add 10 cents per pint or 15 cents per quart, to pay postage.

SPECIAL OFFER ON SEEDS IN PACKETS ONLY.
7 Five-Cent packets for 25 Cts. 15 Five-Cent packets for 50 Cts. 40 Five-Cent packets for $1.00. All packets, unless otherwise mentioned, 5 Cents each.

Market Gardeners or other large planters requiring larger quantities of seeds than are here offered, are invited to write to us for special prices, particularly purchasers of peas, beans, corn, onion, spinach, cabbage and turnip. In writing please state plainly whether you are a market gardener, florist, dealer in seeds, etc.

ASPARAGUS, (Spargal, Ger.)
Sow in April in drills one inch deep and rows twelve inches apart, thin out to four inches in the row, when one year old transplanted into rows three feet apart and two feet in the row. One ounce of seed will sow forty feet of row; 1000 roots will plant an acre.

Colossal—A large and rapid grower, 10 cts. oz.; 20 cts. ¼ lb.; 50 cts. lb.

Palmetto—An improved early variety, vigorous growth and large stocks, 10 cts. oz.; 20 cts. ¼ lb.; 60 cts. lb.

Asparagus Roots.
Colossal—Two-year old roots, $0.75 per 100; $5.00 per 1000.

Palmetto—Two-year old roots, $1.00 per 100; $6.00 per 1000.

BORECOLE or KALE, (Blateter Kohl, Ger.)
Dwarf German Curled Kale.
This may be sown in May and transplanted in the same way as cabbage. They make very tender and delicious greens in the Fall. Very hardy, easily grown, they deserve more general cultivation.

One ounce to one hundred yards of row.

Dwarf German Kale—Very hardy, a standard variety, 10 cts. oz.; 20 cts. ¼ lb.; 60 cts. lb.

Tall Scotch Curled—One of the best, 10 cts. oz.; 30 cts. ¼ lb.; 70 cts. lb.

Persons purchasing seeds at our store, or who wish to pay their own express charges, may deduct 10 cents per pound for all seeds bought by the pound, if quoted at prepaid rates.
BEANS, (Bohne, Ger.) Dwarf Varieties.

The Bean is a tender plant and, therefore, should not be planted until danger from frost is past and then may be planted with success throughout the entire summer in rotation. Sow in open ground, from the end of April to the first of August, in rows two feet apart and thins from six to eight inches in the row. 1 quart to 100 feet of drill, or bushels to the acre.

Add 10 cents per pint, 15 cents per quart, if sent by mail.

Stringless Green Pod—This bean is the only stringless green pod dwarf bean in cultivation. It surpasses all others in crispiness, tenderness and flavor, and is the most prolific bean grown. The pods are 4½ to 5½ inches long, nearly round, slightly curved and of the best quality. They remain long in edible condition and are never stringy.

25 cts. pt.; 50 cts. qt.

BEANS, (Pole or Runners).

They are more tender and require rather more care in culture than the Bush Beans and should be sown a week or two weeks later. They succeed best in sandy loam, which should be liberally enriched with manure. Form hills from three to four feet apart; plant five or six beans in each hill, allowing an inch distance between the plants. This leaves ample space in the center for the pole. Limas will not grow until the weather and ground are warm; if planted early they are apt to rot in the ground. One quart makes 100 to 200 hills, according to size of the beans; 10 to 25 quarts will plant an acre.

Add 10 cents per pint, 15 cents per quart, if sent by mail.

Hempsley Pole—One of the best corn field beans ever introduced. It grows five to six feet high, long yellow pods and average five beans to a pod. 15 cts. pt.; 25 cts. qt.; $1.50 peck.

Kentucky Wonder—A snap bean of wonderful growth, pods grow in clusters, are nearly a foot long, round and pulpy. This is the favorite corn bean in this section. 20 cts. pt.; 30 cts. qt.; $1.75 peck.

Black Kentucky Wonder—Surpasses the old Kentucky Wonder in yield and quality. 25 cts. pt.; 35 cts. qt.

Extra Large Lima—The finest flavored of all shell beans. 16 cts. pt.; 20 cts. qt.; $1.75 peck.

King of the Garden Lima—a vigorous grower, bearing profusely. The beans are large and of rich flavor. 20 cts. pt.; 25 cts. qt.; $2.00 peck.

Horticulturist—(Wren's Egg or Speckled Cranberry)—Earliest and best shell bean, productive and tender. 15 cts. pt.; 25 cts. qt.; $1.50 peck.

White Creasback—A green pod bean, exceedingly productive, pods five to six inches long, perfectly round, with a crease in the back, stringless, very fleshy, early, and of fine quality. 18 cts. pt.; 25 cts. qt.; $1.25 peck.

Southern Prolific—Long, round pods, produced in clusters, early and prolific. 10 cts. pt.; 20 cts. qt.; $2.00 peck.

Cut Short or Corn Hill—An old and popular variety, much used for planting among corn, excellent as a green shell or dry bean. 12 cts. pt.; 20 cts. qt.; $1.50 peck.

Scarlet Runner—Ornamental variety with bright scarlet flowers, also a good string bean. 20 cts. pt.; 40 cts. qt.; $2.50 peck.

Gardeners Wife—This grows from four to six inches long, cut stringless, and of a rich buttery flavor when cooked. The pods remain green and retain their tender, rich flavor until ripe, excellent shell bean for winter use. 50 cts. pt.; 60 cts. qt.; $3.00 peck.

Table Varieties.

Edmand's Improved—Very fine turnip-shaped beet of round form, good size, dark red color and fine flavor. 10 cts. oz.; 20 cts. ½ lb.; 50 cts. lb.

Early Eclipse—The best and most profitable very early variety of excellent form, dark color and tender quality. 10 cts. oz.; 20 cts. ½ lb.; 50 cts. lb.

Egyptian—Extra early, flat turnip-shaped, deep red, tender and sweet. 10 cts. oz.; 20 cts. ½ lb.; 50 cts. lb.

Early Bassano—Flat, turnip-shaped, light red. 10 cts. oz.; 20 cts. ½ lb.; 50 cts. lb.

Dewig's Blood Turnip—Early, blood-red, good size, smooth and handsome. 10 cts. oz.; 20 cts. ½ lb.; 50 cts. lb.

Improved Long Blood—Excellent late sort, dark and smooth. 10 cts. oz.; 20 cts. ½ lb.; 50 cts. lb.

Swiss Chard—Cultivated for its leaves only, the middle ribs of the leaves are cooked. 10 cts. oz.; 20 cts. ½ lb.; 50 cts. lb.

Crosby's Egyptian—An improved strain of the Egyptian Beet in great repute in Boston market. Much thicker than the original, quality is early, better color and quality, and smoother. 10 cts. oz.; 20 cts. ½ lb.; 50 cts. lb.

Beets, (Runkel Rube, Ger.)

Sow as early in spring as the ground can be worked, in light well-manured soil, in drills twelve inches apart, covering the seeds one inch deep and pressing the soil firmly over them. Thin out four inches apart for table beets, and eight to twelve inches for field beets, cultivate frequently. One ounce to 60 feet of drill, five to six pounds to the acre.

Special Prices to Market Gardeners and others desiring large quantities.
SUGAR BEETS AND MANGEL WURZEL.

For Stock Feeding.

Lane’s Improved Sugar Beet—Large, hardy and very productive, 10 cts. oz.; 15 cts. $1 lb.; 25 cts. lb.

Silesian Sugar Beet—Attains a large size and is highly valued for feeding, 10 cts. oz.; 15 cts. $1 lb.; 50 cts. lb.

Golden Tankard Mangel—Bright yellow, large, handsome, heavy Cropper splendid quality, 10 cts. oz.; 15 cts. $1 lb.; 50 cts. lb.

BROCCOLI, (Sparccl Kohl, Ger.)

Resembles cauliflower, but harder. Sow in a hot bed in May, and transplant to a rich, mellow soil in early July. Un. ounce to one hundred yards of row.

Early White Cape—Heads medium, compact, creamy white, 5 cts. oz.; 25 cts. $1 lb.

Early Purple Cape—Greenish-purple heads, hard, good flavor. 20 cts. oz.; 50 cts. $1 lb.

BRUSSELS SPROUTS, (Sprossen Kohl, Ger.)

This plant grows two or three feet high, and produces from the sides of the stalk numeous little sprouts one or two inches in diameter, resembling cabbage.

Dwarf Improved—A variety producing compact sprouts of excellent quality, 25 cts. oz.; 50 cts. $1 lb.; 75 cts. lb.

CABBAGE, (Weisskopf Kohl, Ger.)

CABBAGE, Continued.

Surehead—A large variety producing large, round, flattened heads. It is all head and always sure to head. 20 cts. oz.; 60 cts. $1 lb.; $2.00 lb.

Early Jersey Wakefield—The very best early variety, conical shape, solid, sure heading. 20 cts. oz.; 70 cts. $1 lb.; $2.25 lb.

Henderson’s Early Summer—The best large early cabbage, globular shape, a popular variety amongst market gardeners. 20 cts. oz.; 60 cts. $1 lb.; $2.00 lb.

Early Dwarf York—Early and fine flavored. 15 cts. oz.; 70 cts. $1 lb.; $1.50 lb.

Early Large York—Early and much larger than the Dwarf York. 15 cts. oz.; 50 cts. $1 lb.; $1.50 lb.

All Seasons—Early variety: heads large and solid. 20 cts. oz.; 60 cts. $1 lb.; $2.00 lb.

Early Dwarf Flat Dutch—Heads solid, good flavor, an excellent variety. 15 cts. oz.; 50 cts. $1 lb.; $1.50 lb.

Premium Flat Dutch—Select Stock. Heads large and very solid, they open white and crisp, are tender and well flavored; for the Winter market it has no equal. 20 cts. oz.; 50 cts. $1 lb.; $2.50 lb.

Fottler’s Improved Brunswick—A rapid grower, has large, solid heads, an excellent second early or late variety. 50 cts. oz.; 60 cts. $1 lb.; $2.00 lb.

Large Late Drumhead—Large, solid and tender, an excellent Winter cabbage. 20 cts. oz.; 50 cts. $1 lb.; $1.50 lb.

Red Dutch—The old standard variety for pickling. 20 cts. oz.; 60 cts. $1 lb.; $2.00 lb.

Improved Drumhead Savoy—The finest flavored Winter cabbage, large, round, solid heads. 20 cts. oz.; 50 cts. $1 lb.; $1.75 lb.

CARROT, (Moehren Ger)

The carrot grows best in a light sandy loam, well manured and cultivated. Sow as early as the ground can be worked. In drills 10 inches apart for the small sorts and 14 inches apart for the larger kinds, thin out to 5 or 6 inches apart in the rows. One ounce of seed will sow 150 feet of drill, 4 lb. to the acre.

Early French Forecing—The earliest variety grown, small, tender, fine quality. 10 cts. oz.; 20 cts. $1 lb.; 75 cts. lb.

Early Scarlet Horn—An excellent table sort, fine color and flavor. 10 cts. oz.; 20 cts. $1 lb.; 65 cts.

Half Long Stump Rooted—A fine grained table variety, of fair size and good color. 10 cts. oz.; 20 cts. $1 lb.; 75 cts.

Denver’s Half Long—The most desirable variety for the main crop, productive and keeps well. 10 cts. oz.; 20 cts. $1 lb.; 70 cts. lb.

Chantenay—An early one-half long, stump-rooted variety of the best quality. 10 cts. oz.; 20 cts. $1 lb.; 70 cts. lb.

Intermediate—The roots grow regular and smooth, good size and very productive. 10 cts. oz.; 20 cts. $1 lb.; 70 cts. lb.

Improved Long Orange—Large, heavy cropper and excellent keeper. 10 cts. oz.; 15 cts. $1 lb.; 50 cts. lb.

Large White Belgium—Large, long rooted variety, valuable for feeding stock. 10 cts. oz.; 15 cts. $1 lb.; 50 cts. lb.

Guerande or Oxheart—Extra fine quality, beautiful shape and very productive. Color, a rich orange. In length it is intermediate between the Danvers and Short Horn Carrot. 10 cts. oz.; 20 cts. $1 lb.; 70 cts. lb.

Right Treatment Guaranteed. Give us a Trial.
CAULIFLOWER. (Blumenkohl, Ger.)

The culture of cauliflower is similar to cabbage. It delights in a rich, moist soil, and in dry seasons should be abundantly watered, especially when heading. Sow seeds in the hot house in January or February, and transplant the plants two or three inches apart in boxes, until such time as they are safe to be planted in the open ground. Set the plants 2 feet by 18 inches apart. When heading tie the outside leaves loosely over the head to protect it from the sun.

Henderson's Early Snowball—A very early dwarf variety; producing magnificent white heads of the finest quality. Its compact habit of growth renders it a peculiarly profitable variety to force under glass, as it does equally well for late planting. 20 cts. pkt.; 60 cts. 1/2 oz.; $2.75 oz.

Earliest Dwarf Erfurt—This is the choicest, heads of the largest size, snow-white whiteness, compact and a beautiful form. 20 cts. pkt.; 60 cts. 1/2 oz.; $2.75 oz.

Early Paris—A good standard variety, producing well formed heads. 20 cts. 1/2 oz.; 60 cts. oz.

CELEY. (Sellery, Ger.)

Sow in a hot bed in March, and as soon as the plants are three inches high, transplant into a temporary bed in the open air, 4 inches apart. The plants may remain here until the first of July, and then remove to the trenches. The trenches ought to be a foot wide and deep and 8 feet apart. Spread a layer of well rotted manure in the bottom of the trench and dig in. Set the plants in the bottom of the trench 6 or 8 inches apart. As they grow, cultivate with the hoe, and gradually earth them up, and by the end of September they will be blanched sufficiently for use. Never earth up while the plants are wet, and be careful not to let the soil get into the heart of the plant. Water carefully in dry weather.

Quint Pascal—A superior keeping sort. The stalks are very large, thick, solid, crisp, and of a rich nutty flavor. It blanches easily and retains its freshness a long time. 20 cts. oz.; 60 cts. 1/2 lb.; $2.00 lb.

Golden Self-Blanching—Close, compact perfectly solid, crisp, well-flavored and excellent keeper. 25 cts. oz.; 60 cts. 1/2 lb.; $2.75 lb.

Dwarf Golden Heart—Its handsome color, medium size, fine flavor and good keeping qualities render it the leading sort. 20 cts. oz.; 60 cts. 1/2 lb.; $1.00 lb.

White Pima—A crisp, solid variety, with a piquant, nutty flavor, almost self-blanching, the stocks requiring very little earthing up. Very ornamental for the table. 20 cts. oz.; 60 cts. 1/2 lb.; $1.75 lb.

Giant White Solid—Fine, large size, tall and of stiff growth. 20 cts. oz.; 60 cts. 1/2 lb.; $2.00 lb.

Boston Market—Dwarf, branching habit, solid, crisp, well-flavored. 20 cts. oz.; 60 cts. 1/2 lb.; $2.00 lb.

Paris Golden Yellow—Close, compact growth, golden yellow color. The stock is solid and crisp and a good keeper. 60 cts. oz.; $1.00 lb.

Celerole or Turnip Rooted—The round, solid roots of this variety are used for flavoring. 15 cts. oz.; 50 cts. 1/2 lb.; $1.75 lb.

Soup or Flavoring—25 cts. lb.

CORN SALAD. (Akersalat, Ger.)

Used as a salad. Sow as early in spring as the ground can be worked, in drills 12 inches apart, and cover lightly. For winter and spring use, sow in September, and winter over in cold frames.

Large Seeded The standard variety. 10 cts. oz.; 20 cts. 1/2 lb.; 60 cts. lb.

Order Early.

The planting of corn should begin as early as April as the weather will permit, and kept up at intervals throughout the season so as to keep up a constant supply. The first planting should be made of the "extra early" sorts, and the last planting of the Improved Evergreen Sugar, and you will not fail to have a constant supply from the middle of June to the middle of October.

Early Blanched Plants: 2000. $2.00

Add 10 cents per pint, 15 cents per quart, if sent by mail.

Country Gentleman—The ears are of good size and produced in great abundance, bearing three to four good ears to a stalk. Cob very small, kernels are of nearly whiteness and delicious quality. 10 cts. pt.; 20 cts. qt.; 85 cts. peck.

First of All—Almost a week earlier than the Cory and Dwarf, but of superior quality. 10 cts. pt.; 20 cts. qt.; 75 cts. peck.

Zig Zag Evergreen—This variety of Evergreen Sweet Corn is one of the best for private use, market gardeners and canners. It is of extra quality, very sweet and juicy in the green state. It ripens about same time as Stowell's Evergreen, and superior to that well-known variety in sweetness and flavor. 10 cts. pt.; 30 cts. qt.; 80 cts. peck.

Extra Early Cory—Second earliest variety in cultivation, producing good sized ears, fine quality and productive. 10 cts. pt.; 50 cts. qt.; 75 cts. peck.

Extra Early Adams—An old standard white corn, ready for table sixty days after germination, not a sweet corn. 10 cts. pt.; 50 cts. qt.; 75 cts. peck.

Early Marblehead—Good early corn, medium size, prolific, week later than Cory. 10 cts. pt.; 20 cts. qt.; 75 cts. peck.

Early Minnesota—An early sort, of dwarf habit. 10 cts. pt.; 20 cts. qt.; 75 cts. peck.

Crosby's Early—One of the finest early sweet corns, productive and of excellent quality. 10 cts. pt.; 20 cts. qt.; 75 cts. peck.

Moore's Concord—A second early variety, larger than Crosby's, excellent quality. 10 cts. pt.; 20 cts. qt.; 75 cts. peck.

White Cory—Much the same as the Red Cory, with the greatest advantage of a white cob. 10 cts. pt.; 20 cts. qt.; 75 cts. peck.

Egyptian—A late sort, ripening with Stowell's, largely used for canning. 10 cts. pt.; 30 cts. qt.; 75 cts. peck.

Perry's Hybrid—Early and of large size, good for market. 10 cts. pt.; 20 cts. qt.; 75 cts. peck.

Stowell's Improved Evergreen—The standard late sort, large ears, remains long green. 10 cts. pt.; 25 cts. qt.; 75 cts. peck.

Mammoth Sugar—Large, long, full ears, of excellent flavor. 10 cts. pt.; 40 cts. qt.; 75 cts. peck.

Adam's Early—Old standard sort. 10 cts.; 20 cts. qt.; 75 cts. peck.

Black Mexican—Its merit is its sweetness. 10 cts. pt.; 20 cts. qt.; 75 cts. peck.

Shaker's Early—The kernels are large, of pearly whiteness and delicious flavor. It is a great favorite with market gardeners. 10 cts. pt.; 20 cts. qt.; 75 cts. peck.

SEED POP CORN.

White Pearl—Our common market variety. 10 cts. pt.; 20 cts. qt.

White Rice—A handsome variety, kernels long and pointed, very white. 10 cts. pt.; 20 cts. qt.

Queen's Golden—The stalks grow six feet high, and the large ears produced in abundance, 10 cts. pt.; 20 cts. qt.

We always have in stock a large supply of old corn for popping, and are prepared to fill all orders at market prices.

Order Early. Please order as soon after you get this Catalogue as possible, and then you will have your seeds at hand for planting when you want them, besides, if you want heavy seeds in large quantities, they can be sent by freight very cheaply.
SWEET CORN FOR FODDER.

There is nothing better for green feed, or curing for winter, than sweet corn. Cattle highly relish it, and when fed on it, keep in fine condition, and give an abundance of milk. Also excellent for soiling. Sow thickly in drills or broadcast at the rate of two to three bushels per acre. 50 cts. pk.; $1.50 bushel; 10 bushel lots, $1.35 bushel. Subject to market change.

CUCUMBERS, (Gurken, Ger.)

As soon as the weather becomes settled and warm, plant in hills from four to six feet apart each way, with eight or ten seeds in each hill cover half an inch deep, smoothing the hill off with the hoe. Keep the soil well stirred, and when the plants are out of danger of insects, leave three or four plants to the hill. For pickles, plant from the first of June to the first of August. The fruit should be gathered when large enough, whether required for use or not, as, if left to ripen on the vines, it destroys their productivity. One ounce for 50 hills, 1 to 2 lbs. per acre.

Japanese Climbing—Is strong, vigorous and prolific, fruit 10 to 12 inches long, of a dark green color, delicious flavor. The vines are proof against mildew, never suffering from wet weather or insects. 15 cts. oz.; 25 cts. pk.; $1.00 lb.

Cool and Crisp—This variety is inclined to taper off at the stem end, and is generally a little pointed at the other end also; is the most desirable shape for pickles. 10 cts. oz.; 20 cts. pk.; 50 cts. lb.

Extra Early Russian—The earliest, hardy, prolific; excellent for small pickles. 10 cts. oz.; 20 cts. pk.; 50 cts. lb.

Early Cluster—A short, prickly variety, bearing in clusters, very prolific. 10 cts. oz.; 20 cts. pk.; 50 cts. lb.

Early Frame—Early, medium length, good for forcing. 10 cts. oz.; 20 cts. pk.; 50 cts. lb.

Improved White Spine—Medium length, crisp, well-flavored, prolific. One of the most popular varieties grown. 10 cts. oz.; 20 cts. pk.; 50 cts. lb; 60 cts. per lb.

Improved Long Green—Very popular, late variety, dark green, crisp, tender, and well-flavored. 10 cts. oz.; 20 cts. pk.; 50 cts. lb.

Jersey Pickling—The best variety, for pickling, short, straight, dark green, fine quality, great bearer. 10 cts. oz.; 20 cts. pk.; 50 cts. lb.

Green Prolific—One of the best for pickles, very uniform in growth, extremely productive, and its flavor makes it desirable also for a table variety. 10 cts. oz.; 20 cts. pk.; 60 cts. lb.

Nichol's Medium Green—Early, good for forcing or pickles, dark green, medium prolific, standard and smooth, in length between the White Spine and Long Green, a decided acquisition. 10 cts. oz.; 20 cts. pk.; 60 cts. lb.

West India Gherkin—A small, green, pickling sort, used for pickling only. 15 cts. oz.; 20 cts. pk.; $1.00 lb.

CRESS OR PEPPER GRASS, (Kresse, Ger.)

Well-known pungent salad, can be used alone or with lettuce. Requires to be sown (nicely curling very slightly), at frequent intervals to keep up a succession, as it soon runs to seed.

Extra Double Curled—Fine pungent flavor, extensively used as a salad. 10 cts. oz.; 20 cts. pk.; 50 cts. lb.

Water Cress—Hardy aquatic perennial, growing readily on the banks of streams or ponds. 25 cts. oz.; $1.00 lb.

ENDIVE, (Endivien, Ger.)

Sow in June or July, and transplant 8 or 10 inches apart in rows 15 inches apart. Used as a salad, and requires to be blanched by tying the leaves together at the top and placing boards to exclude the light. One ounce of seed to 30 feet of drill.

Green Curled—One of the best, dark green, finely curled, 15 cts. oz.; 45 cts. pk.; $1.50 lb.

Moss Curled—Beautifully and densely curled, very ornamental. 15 cts. oz.; 45 cts. pk.; $1.50 lb.

Batavian Broad-Leaved—A large summer variety, very productive. 15 cts. oz.; 45 cts. pk.; $1.50 lb.

We Sharpen, Clean and Repair all Leading Makes of Lawn Mowers.
LETTUCE, Continued.

Deacon or Nonpareil—This is a fine market variety, crimped, curled and well-formed heads, withstands the heat of summer well. 15 cts. oz.; 35 cts. $1 lb.; $1.00 lb.

California Cream Butter—This variety forms round, solid heads of good size, medium early and one of the best summer sorts. 15 cts. oz.; 35 cts. $1 lb.; $1.00 lb.

Grand Rapids Forcing—It is of handsome appearance, a strong grower, and not apt to rot, and will keep from wilting longer white exposed for sale than any other sort. It matures two weeks earlier than Tennis Ball. 15 cts. oz.; 30 cts. 1/4 lb.; 90 cts. lb.

Big Boston—This variety resembles the well-known Boston Market Lettuce, but produces heads almost double the size and matures a week later. 15 cts. oz.; 35 cts. 1/4 lb.; $1.25 lb.

Early Curled or White Seeded Simpson—Does not head, but forms a compact, close mass of leaves, excellent for forcing. 10 cts. oz.; 60 cts. $1 lb.; 80 cts. lb.

Black Seeded Tennis Ball—Solid, dark green heads, very hardy, one of the best for out-door growing, crisp and tender. 18 cts. oz.; 90 cts. 1/4 lb.; 80 cts. lb.

White Seeded Tennis Ball—A fine early sort, small heads, very hardy, valuable to grow in cold frames in winter. 15 cts. oz.; 30 cts. 1/4 lb.; 80 cts. lb.

Boston Market—The best forcing head sort, very compact and is beautiful white and crisp. 15 cts. oz.; 30 cts. 1/4 lb.; 80 cts. lb.

Improved Hanson—A splendid out-door lettuce, heads very close, solid and large, crisp, tender, sweet, green out-side, white within. 10 cts. oz.; 35 cts. 1/4 lb.; $1.00 lb.

All the Year Round—Hardy, heads firm, medium, does not run to seed readily. 15 cts. oz.; 35 cts. 1/4 lb.; $1.00 lb.

Paris White Cos—The best of the Cos varieties, with long upright leaves, blanches readily when tied up. 15 cts. oz.; 90 cts. 1/4 lb.; $1.00 lb.

Philadelphia Butter or Early White Head—A thick-leaved, smooth lettuce, round dark green leaves, formed into a very solid, round head; stands a long time without running to seed. The inner leaves blanch a rich yellow; quality first class. 15 cts. oz.; 35 cts. 1/4 lb.; $1.00 lb.

DENVER MARKET—An early variety in head lettuce, either for forcing or open ground, it forms large solid heads of light green color and is very slow to go to seed. 15 cts. oz.; 60 cts. 1/4 lb.; $1.00 lb.

LETTUCE Mixture—All sorts. It can not fail to please. Will give a succession of good lettuce throughout the season. A fine contrast to our Radish Mixture, when planted along side of it. 15 cts. 20 cts. 1/4 lb.; $1.00 lb.

MELON, WATER, (Wassermelone, Ger.)

Water Melons require the same treatment and soil as described for the Musk Melon, but being more tender, should be given a southern exposure if possible. The hills should be eight feet apart. One ounce for 30 hills, about 5 lbs. for an acre.

Triumph—Very prolific, early and of uniformly large size, and fine flavor. A good shipper. 10 cts. oz.; 30 cts. 1/4 lb.; 90 cts. lb.

Florida Favorite—Of medium size, very prolific and unexcelled as a table variety. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

Black Spanish—Round, dark green, flesh scarlet, with delicious sweet flavor. 10 cts. oz.; 50 cts. 1/4 lb.; 60 cts. lb.

Cuban Queen—A very fine variety, growing to great size, flesh bright red, very solid and sweet. Remarkably productive and an excellent keeper. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

Kohl’s Gem—Light green, nearly round, averaging thirty to fifty pounds in weight, flesh bright red, rich and sweet, a good shipper. 10 cts. oz.; 60 cts. 1/4 lb.; 60 cts. lb.

Dixie—Of excellent merits, recommended as best shipping melon grown, being even larger, earlier and far more productive than the Kohl Gem. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

Gipsy or True Georgia Rattlesnake—Very large, long and smooth and distinctly striped, flesh bright scarlet, a favorite shipping melon in the south. 10 cts. oz.; 60 cts. 1/4 lb.; 60 cts. lb.

Mammoth Ironclad—Of large size and great weight, flesh deep red and of delicious flavor. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

Mountain Sweet—Oblong, with dark green skin, flesh very solid and sweet. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

Phinney’s Early—Productive, early and finely flavored, red flesh. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

Peerless or Ice Cream—Of medium size, thin rind, light green, flesh scarlet, solid to center and sweet. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

Pride of Georgia—Dark green, oval, a good shipper. If well-grown attains a large size. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

Seminole—It is of two distinct colors, gray and light green. Melons of both colors are often found on the same vine, and while of large size, it is very early, productive and of excellent quality. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

The Boss—A handsome, early, oblong variety, nearly the same thickness throughout, skin very dark, flesh deep scarlet, sugary and melting. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

True Dark Icing—Very solid, rind very thin, highly prized as a shipper. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

Light Icing—Solid, always of good flavor, and thin light green rind. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

Citron—A round, handsome fruit of small size, used for making sweet meats and preserves, seeds red, flesh white. 10 cts. oz.; 60 cts. 1/4 lb.; 75 cts. lb.

Sweetheart—Fruit large, oval, very heavy, uniformly mottled light and dark green, rind thin but firm, flesh bright red, firm, solid, but very tender, melting and sweet. 10 cts. oz.; 60 cts. 1/4 lb.; 75 cts. lb.

Tested Seeds for All Soils and Climates, Improved by Selection and Cleaning.
MELON, MUSK, (Zucker Melone, Ger.)

A light rich soil is the most suitable for melons of all kinds. In very rich soil the hills should be six feet apart, in poor soil about five feet. Before planting the seed, mix a peck of rotted manure with the soil in each hill. About the middle of May, plant the seeds half an inch deep, 6 or 8 in each hill. When the plants are well up, thin out, leaving 3 to a hill. One ounce of seed to 60 hills, 2 to 3 pounds for an acre.

Rocky Frd.—This wonderful and delicious Melon has attracted more attention than ever before known in the history of the melon trade and will soon be foremost in demand. It cannot be exceeded in flavor and is one of the best for shipping. No market gardener should be without it as it is sure to give satisfaction. As we only have a limited supply of this seed this season we would advise all to order early, so as not to be disappointed and thereby miss an opportunity of procuring a melon that recognizes no competition, but sells itself. It is a round and of medium size, densely netted and thick meated. Will weigh on an average one to one and one-half pounds each, making it one of the most desirable of melons for restaurant and hotel purposes. 10 cts. oz.; 30 cts. ½ lb.; 75 cts. lb.

Columbus—The skin is a bright, glossy yellow color when fully ripe, its green flesh is very deep, quality is all that can be desired. 10 cts. oz.; 20 cts. ½ lb.; 50 cts. lb.

Delmonico—It is an oval melon of large size and deeply netted. The flesh is an orange color of the same fine quality as the Emerald Gem. 10 cts. oz.; 15 cts. ½ lb.; 30 cts. lb.

Extra Early Hackensack—Past becoming the most popular variety with market gardeners. Fruit large, round and netted. Flesh green and deliciously flavored. Very productive indeed and a good shipper. 10 cts. oz.; 20 cts. ½ lb.; 50 cts. lb.

Emerald Gem—Of medium size, and a deep emerald green color. Flesh is a suffused salmon color, almost red; flavor is sweet and luscious. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

Acre—The gardener’s favorite. Slightly oblong and netted. The flesh is light green and thick, and has a rich, sweet flavor. It is a distinct variety, and one of the best for marketing. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

Large Hackensack—Early, round, netted, deeply ribbed, flesh green, very sweet and highly flavored. 10 cts. oz.; 20 cts. ½ lb.; 50 cts. lb.

Jenny Lind—A small, very early variety, round, netted, flesh light green, excellent flavor. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

Orange Christina—Early, very productive, thick fleshed, melting, delicious. 10 cts. oz.; 25 cts. ½ lb.; 75 cts. lb.

Improved Cantaloupe—Flesh light green, very prolific. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

Casaba or Large Persian—Green flesh, oblong form and large size. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

Montreal Market—Very large sort, nearly round, deeply netted, deeply ribbed, green-fleshed, thick, and of a delicious flavor, a great bearer and very popular. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

Netted Gem—Very early, small, coarsely netted, green flesh, fine flavored. 10 cts. oz.; 20 cts. ½ lb.; 75 cts. lb.

We Pay the Postage on all Flower and Vegetable Seed, by the Packet, Ounce or Pound.
ONION, (Zwiebeln, Ger.)

A light, loamy soil suits the onion best, and it may be grown for many consecutive years on the same ground. Previous to sowing the ground should be well manured and deeply plowed. Narrow and rake the surface smooth and even. As early in spring as possible, sow the seed in drills 1 inches apart and half inch deep, keeping firmly over the seed. A cultivator may be used between the drills, being careful not to throw too much soil and the drills must be carefully and never allow the weeds to get ahead of the young plants. One ounce to 100 feet of drill, 4 to 6 pounds per acre.

**Extra Early Red**—A very early variety, of medium size, deep red, mild flavor, for table and market use. 15 oz.; 50 cts. $1.50 lb.

**Large Red Wethersfield**—Excellent flavor, grows large, hardy and keeps well. 15 oz.; 40 cts. $1.25 lb.; 30 cts. $2.25 lb.

**David's Yellow Globe**—Early, with very small neck, large size, fine quality and good keeper, the best for general crop. 15 oz.; 40 cts. $1.25 lb.; 20 cts. $2.50 lb.

**Large Yellow Dutch**—Favorite old variety, large round and excellent keeper. 10 cts. oz.; 40 cts. 1/4 lb.; $1.35 lb.

**White Portugal or Silver Skin**—Early, mild flavored and excellent for first crop. 20 cts. oz.; 50 cts. 1/4 lb.; $1.75 lb.

**White Queen**—Beautiful white skin, the earliest variety, most excellent flavor and a good keeper. 30 cts. oz.; 50 cts. 1/4 lb.; $1.50 lb.

**Mammoth Silver King**—One of the largest onions in cultivation, early, shape flat, but very thick, skin a silvery white, flesh mild, delicate and of snowy white color, a handsome and very popular variety. 20 cts. oz.; 70 cts. 1/4 lb.; $2.00 lb.

**OKRA or GUMBO, (Ocker, Ger.)**

The young, green seed-pods of this plant, are used in soups, or stewed and served like asparagus. The young pods can also be dried for winter use.

**Improved Dwarf Green**—This variety has long, slender pods, very good flavor and only grows 1 inches high. 10 cts. oz.; 20 cts. 1/4 lb.; 65 cts. lb.

**White Velvet**—The pods of this variety are round and smooth, and much larger than the common variety and are produced in great abundance. 10 cts. oz.; 20 cts. 1/4 lb.; 65 cts. lb.

**PARSLEY, (Petersilie, Ger.)**

Parsley succeeds best in a rich, mellow roll. As the seeds germinate very slowly, three or four weeks elapsing sometimes before it makes its appearance, it should be sown early in spring. Sow thickly in rows a foot apart and half inch deep. For winter use, protect in a frame or light cellar. One ounce will sow 200 feet of dr. -

**Double Curled**—A fine dwarf variety, beautifully curled, excellent for garnishing. 10 cts. oz.; 20 cts. 1/4 lb.; 65 cts. lb.

**Champion Moss Curled**—A very select stock, beautifully crimped and curled. 10 cts. oz.; 20 cts. 1/4 lb.; 65 cts. lb.

**Plain Leaved**—Very strong variety. 10 cts. oz.; 20 cts. 1/4 lb.; 65 cts. lb.

**PARSNIP, (Pastinake, Ger.)**

Sow as early in the spring as the weather will admit, in drills 15 inches apart in the rows. Unlike carrots, they are improved by frost, and it is well to sow quite a certain quantity for winter use, leaving the rest in the ground until spring, to be dug up as required. One ounce will sow 100 feet of dr. -

**Long Sugar**—The best for general use. 10 cts. oz.; 20 cts. 1/4 lb.; 50 cts. lb.

**Good old sort**. 10 cts. oz.; 20 cts. 1/4 lb.; 50 cts. lb.

**PEAS, (Erbsen, Ger.)**

Peas come earlier to maturity in light, rich soil. For general crop a good dressing should be applied, and for the dwarf-growing kinds the soil can hardly be too rich. Plant the early varieties as soon as the ground can be worked, the others in succession from April to June. For private use, they are generally sown in double or single rows, in drills, about two feet apart and three inches deep, for the dwarf varieties, three to four feet apart and four inches deep for the taller varieties. These growing over two, and a half feet in height should be bushed. One quart to 80 feet of drill, 1/2 bushel for one acre.

Add 10 cts. per pint, 15 cts. per quart extra, sent by mail.

**Wrinkled Varieties Marked *.

**First and Best**—My selected stock of this fine, standard variety, is quite unsurpassed for earliness, productiveness, excellent flavor and size of pod, two feet high. 10 cts. pt.; 20 cts. qt.; $1.00 peck.

**Aniska**—One of the earliest and most productive of the very early pea, dwarf, two feet. 10 cts. pt.; 20 cts. qt.; $1.00 peck.

**Maud S**—Have a limited supply from original stock. 10 cts. pt.; 20 cts. qt.; $1.00 peck.

**Philadelphia Extra Early**—The well-known early variety, height two and a half feet. 10 cts. pt.; 20 cts. qt.; $1.00 peck.

**Improved Daniel Rourke**—Very early, fine cropper, long pods, exquisite flavor, height two and a half feet. 10 cts. pt.; 20 cts. qt.; $1.00 peck.

**Early Rent or May**—A favorite first early variety. 10 cts. pt.; 20 cts. qt.; $1.00 peck.

**Tom Thumb**—An old and well known dwarf sort, height ten inches. 15 cts. pt.; 25 cts. qt.; $1.25 peck.

**American Wonder**—A remarkably fine, dwarf wrinkled variety, extra early, requires no bushing, very sweet flavor, height about one foot. 15 cts. pt.; 25 cts. qt.; $1.25 peck.

**Malcolm's Little Gem**—An early green marrow of excellent quality and an abundant bearer, height one and one-half feet. 10 cts. pt.; 20 cts. qt.; $1.25 peck.

**Impoved Champion of England**—One of the best peas grown, unsurpassed in flavor, sweetness and general excellence. Our stock is maintained pure by careful selection, height five feet. 10 cts. pt.; 20 cts. qt.; $1.00 peck.

**Mingus**—The best late marrow peas grown, immense pods, splendid flavor, vigorous growth, very popular, height two and a half feet. 15 cts. pt.; 25 cts. qt.; $1.50 peck.

**Winter's Telephone**—Green wrinkled, peculiar light shade of green, productive, pods unusually large size, elegant shape, slightly curled, well filled with peas of large size, good quality, height three and a half feet. 10 cts. pt.; 20 cts. qt.; $1.00 peck.

**Dwarf Blue Imperial**—A great bearer and fine flavored, height three feet. 10 cts. pt.; 20 cts. qt.; $1.25 peck.

**Yorkshire Hero**—A splendid main crop pea, dwarf and branching, very prolific and delicious flavor, height three feet. 10 cts. pt.; 20 cts. qt.; $1.00 peck.

**Black Eye Marrow**—A good late sort for market, hardy, productive, excellent either as a field or table pea, height three feet. 10 cts. pt.; 15 cts. qt.; 15 cts. peck.

Our "Emerald Lawn Grass Seed" cannot be excelled. Will make a good lawn first season from seed.
PEAS, Continued,

* New Eclipse—This is an early green wrinkled pea, the pods resembling the American Wonder in size and shape of the pod. It is earlier than the Alaska and the most productive of any green wrinkled pea. We unhesitatingly recommend it as the best early pea for the private garden. Height of vine 3 ft. 15 cts. pt.; 25 cts. qt.; $1.50 pk.

* Nott's Excelsior—Remarkably hardy and productive one of the earliest of wrinkled peas. It is unsurpassed in size and quality, 10 cts. pt.; 25 cts. qt.; $1.25 pk.

Large White Marrow—One of the best late sorts, very productive, good flavor, height five feet. 10 cts. pt.; 15 cts. qt.; 75 cts. peck.

* B'iss' Everbearing—Height, 18 inches, a continuous bearing wrinkled variety. The best for late planting. 15 cts. pt.; 25 cts. qt.; $1.25 peck.

Blue Peter—A larger, better and earlier form of Tom Thumb, having blue seed. Very dwarf and early; a good bearer, and of excellent quality. 10 cts. pt.; 20 cts. qt.; $1.10 peck.

* Carter's Premium Gem—An improved Little Gem. Dwarf, prolific, fine flavored, large pods, excellent, either for market or home use, height one and one-half feet. 10 cts. pt.; 20 cts. qt.; $1.55 peck.

Melting Sugar—An edible podded variety growing from four to five feet high; pods very large, four to five inches long, and one or more broad, each usually containing from five to eight large peas. Being edible podded, it should be used the same way as a wax bean; very sweet and tender. 10 cts. pt.; 15 cts. qt.; $1.50 peck.

* Pride of the Market—A strong growing variety, growing from 18 to 24 inches high, and is very productive. The pods are unusually large and the pea, when cooked, are of very superior quality. 15 cts. pt.; 25 cts. qt.; $1.50 peck.

Canada Field—Mostly used as a field crop. 10 cts. qt.; 40 cts. peck; $1.30 bushel. Subject to market change.

PEPPER, (Pfeffer, Ger.)

A light, warm loam is the best soil for peppers. Sow in March or April, in a hot-bed, and transplant when the weather is warm. They are quite tender, and will not bear frost. Set the plants fifteen inches apart, and two feet between the rows. One ounce for 1,500 plants.

Golden Dawn—A new variety, very handsome, golden yellow, sweet, mild, and very productive. 20 cts. oz.; 60 cts. 1/4 lb; $2.00 lb.

Celestial—Another handsome, new pepper, when fully ripe vivid scarlet, very productive, sharp clear flavor, excellent. 20 cts. oz.; 60 cts. 1/4 lb; $2.00 lb.

Red Chili—Small, cone-shaped, bright red, fiery. 25 cts. oz.; 75 cts. 1/4 lb.

Large Bell or Bull Nose—Large, early bright red, mild. 20 cts. oz.; 60 cts. 1/4 lb; $2.00 lb.

Sweet Mountain—A large early sort, mild and excellent, bright red. 25 cts. oz.; 75 cts. 1/4 lb.

Long Red Cayenne—Long bright red, fiery. 20 cts. oz.; 60 cts. 1/4 lb; $2.00 lb.

Ruby King—Beautiful, bright red, large fruit and mild, the best pepper for mangos in cultivation. 25 cts. oz.; 75 cts. 1/4 lb; $2.25 lb.

PUMPKIN, (Kuerbis, Ger.)

These are usually grown for stock feed, and are generally scattered at intervals in the hills while planting sweet corn. For making mumpkin pies the squashes are very much superior. One ounce to fifteen hills or seeds to an acre.

Large Cheese—Very superior, productive, fine grained, good flavor, cheese shaped. 10 cts. oz.; 20 cts. 1/4 lb; $0.60 cts. lb.

Cashew—One of the largest and best, yellow, solid, good keeper. 10 cts. oz.; 20 cts. 1/4 lb; $0.60 cts. lb.

Large Tons or Mammoth—Grows enormously large, round, flattened, skin salmon, flesh yellow, fine grained, good quality. 10 cts. oz.; 25 cts. 1/4 lb; 75 cts. lb.

Tennessee Sweet Potato—An excellent variety for pies, pear shaped, of medium size, flesh and skin creamy white, fine grained, very sweet and delicious. 10 cts. oz.; 25 cts. 1/4 lb; 55 cts. lb.

Kentucky Field—Good for cooking purposes or for feeding stock. 10 cts. oz.; 25 cts. 1/4 lb; 55 cts. lb.

Connecticut Field—The common yellow pumpkin. 10 cts. oz.; 25 cts. 1/4 lb; 60 cts. lb.

St. George—Oblong in shape, with ten to twelve prominent ridges from stem to blossom end. Outer color of skin, very dark green, and flesh orange color, keep well all winter. 10 cts. oz.; 20 cts. 1/4 lb; 60 cts. lb.

RADISH, (Radies, Ger.)

All the varieties thrive best in a light, sandy loam. For early use sow in the hot-bed in February, giving plenty of ventilation, or outside in drills as soon as the soil can be got in order, covering the seed about half an inch deep. Sow every two weeks, from March to September, for a succession, they must grow rapidly to be crisp, mild and tender. One ounce sows too few of drills, 8 to 10 pounds to an acre.

Cincinnati Market—Grows six to seven inches in length, straight, and smooth, flesh is exceedingly tender, crisp and delicious; never becomes hollow and pithy. Skin is very thin and has an attractive, glossy appearance. Undoubtedly the finest long red Radish for either the market or house gardener. 10 cts. oz.; 25 cts. 1/4 lb; 60 cts. lb.

Extra Early Carmine—One of the handsomest and best of all the extra early radishes, of 2 inch, dark carmine color. The foliage is short, stiff and extremely small. In 20 to 22 days the crisp, tender little radishes are ready to pull. 10 cts. oz.; 25 cts. 1/4 lb; 75 cts. lb.

Early Scarlet Turnip—The standard early, short, quick-growing variety. 10 cts. oz.; 20 cts. 1/4 lb; 50 cts. lb.

Extra White Turnip—Of mild flavor, excellent for summer use. 10 cts. oz.; 20 cts. 1/4 lb; 50 cts. lb.

Early Long Scarlet Short Top—The standard variety for market and private use. 10 cts. oz.; 20 cts. 1/4 lb; 50 cts. lb.

French Breakfast—Form oval, scarlet, tipped with white, quick growing, and excellent flavor. 10 cts. oz.; 20 cts. 1/4 lb; 60 cts. lb.

Golden Globe—This variety is very popular. It is of a quick growth, tender and brittle, of perfect globe shape. 10 cts. oz.; 25 cts. 1/4 lb; 60 cts. lb.

Charlton—Grows to a large size without losing its tenderness; scarlet, tipped with white, long, crisp and tender. 10 cts. oz.; 20 cts. 1/4 lb; 60 cts. lb.

Giant White Stuttgart—A quick-growing early sort, largest size, flesh and skin pure white. Fine quality; firm and brittle, never gets pithy. 10 cts. oz.; 20 cts. 1/4 lb; 60 cts. lb.

White Strasbourg—A large, handsome, white variety, of excellent quality and early. 10 cts. oz.; 20 cts. 1/4 lb; 60 cts. lb.

Long White Naples—A handsome, long, clean, white radish, crisp and tender, good for summer use. 10 cts. oz.; 20 cts. 1/4 lb; 60 cts. pound.

Our Vegetable Seeds are grown under our direct supervision in localities best adapted to their perfect growth, and we feel certain that we can supply as good seed as can be obtained anywhere.
RADISH, Continued.

**Brighit Long Scarlet**—It is very early, maturing in 20 to 25 days, the flesh crisp and tender, excellent for home garden and particularly desirable for the market, as it sells quickly because of its fine color and form. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

**Wood’s Early Frame**—Long scarlet radish, excellent for forcing. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

**Golden Dresden**—We recommend this alike for family garden and for market as one of the most valuable and quick growing radishes. Tops very scant and admits of close planting. It is perfectly round, smooth and very attractive, light golden Irown skin. The flesh is crisp, white, juicy and of finest flavor. Market gardeners can grow this new radish in the garden or force it, and depend upon a remarkable perfect, early, uniform crop. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

**Chinese Rose Winter**—Popular winter sort, medium size, bright rose, excellent. 10c oz.; 20c ½ lb.; 60c lb.

**Round Black Spanish**—A winter variety, large, mild and firm, skin black, flesh white. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

**California Mammoth White**—Grown extensively by Chinese in California. 8 to 12 inches long, 2 to 3 inches in diameter, white, solid, good flavor. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

**Radish Mixture, all sorts**—This is especially adapted to the wants of those having only a small garden, as it contains all of the leading varieties, and will give a succession of fine radishes. Try a package. It will please you. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

RHUBARB, (Rhabarber, Ger.)

A deep, rich soil is best for rhubarb, sow early in drills 18 inches apart and 1 inch deep, the spring following transplant, allowing each plant at least 3 feet square. One ounce for about 800 plants.

**Lancen**—Extra large, tender. 15 cts. oz.; 50 cts. ½ lb.; $1.50 lb.

**SALSIFY, (Hafer-wurzel, Ger.)**

Commonly called Vegetable Oyster. Used stewed, boiled or fried. When cooked has an oyster flavor. Sow early in drills 15 inches apart, cover the seed with fine soil, an inch and a half deep. One ounce will sow 50 feet, seven pounds to an acre.

**Long White French**—The standard variety. 10 cts. oz.; 25 cts. ½ lb.; 90 cts. lb.

**Mammoth Sandwich Island**—This variety is of enormous size, twice as large as the ordinary sort, very tender and delicious. 10 cts. oz.; 25 cts. ½ lb.; $1.00 lb.

**SPINACH, (Spinat, Ger.)**

This is the best developed and most tender and succulent when grown in very rich soil. For summer sow early in spring in drills 15 inches apart, and make sowings every two weeks. For spring use sow in September, and cover lightly in November with light litter. One ounce to 100 feet of drill. Ten to twelve pounds for acre.

**Bloomsdale Savoy**—Thick, succulent leaves, very productive and hardy. 15 cts. ½ lb.; 45 cts. lb.

**Round Thick Leaf**—One of the best for early spring or fall sowing, leaves large, thick and succulent. 15 cts. ½ lb.; 45 cts. lb.

**Long Standing Thick Leaved**—Does not run to seed so readily as the other. 15 cts. ½ lb.; 45 cts. lb.

**Prickly**—Vigorous and hardy, good for winter. 10c ½ lb.; 30c lb.

**SQUASH, (Kuerbis, Ger.)**

The squash is of tropical origin, and only succeeds well in a warm temperature, consequently the seeds should not be planted out until the ground is warm and mellow. The hills should be about six feet apart for winter varieties, and four feet for summer sorts. Plant a dozen seeds in each hill. Thin out the weakest vines, and when all danger from bugs is past, leave three vigorous vines to the hill. Cultivate well, and keep the ground clear of weeds. One ounce of seed to about 40 hills, four to six pounds to the acre.

**Early White Bush or Patty Pan**—A scollop sort, best for early use. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

**Perfect Gem**—Excellent for summer, and equally good as a winter variety, very productive. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

**Essex Hybrid**—Productive, good keeper, and one of the best flavored. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

**American Turban**—Excellent quality, flesh thick and sweet, superior fall sort. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

**True Hubbard**—A general favorite, hard, dark green shell, meat thick, dry and finely flavored. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

**Boston Marrow**—Good keeper, and of excellent flavor, swell orange, quite hard, several weeks earlier than the Hubbard. 10c oz.; 20c ½ lb.; 60c lb.

**Marblehead**—Color light blue, splendid keeper, for sweetness, dryness and fine flavor quite unsurpassed. 10c oz.; 20c ½ lb.; 60c lb.

**Sibey**—New, superior in flavor and quality, shell pale green, very hard, flesh orange, solid, very thick and dry, wonderful for fineness of grain and delicacy of flavor, productive and keeps well, weight about 10 pounds. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

**TOMATO, (Liebesapfel, Ger.)**

To obtain fruit very early, sow in the hotbed in March. In about 5 weeks plants should be transplanted to another hotbed, setting them 4 or 5 inches apart. Here they should remain, having the air as warm as possible, until about the middle of May, when they may be put out in the ground. If not too early or too cold, a cold frame will answer for the first transplanting. Pinching off a portion of the side branches, and stopping others just as they fall, but beyond where the fruit is formed, hastens the ripening. Very good plants can be grown in boxes in the house. One ounce of seed will produce about 1,000 plants.

**Buckeye State**—The tomatoes are borne in immense clusters of four to eight fruits, and occasionally ten large fruit have been found on a single cluster. In solidity and meastiess it has no equal while in luscious qualities none surpass it. The color is much the same as Beauty, but a darker and richer shade, and this, together with its very large size and clear-cut outlines, makes it very showy and striking when displayed for sale. 20 cts. oz.; 50 cts. ½ lb.; $2.00 lb.

**Ponderosa**—This monstor tomato is all solid meat, being uniformly large, smooth, of dark rich crimson color, and a delicious sub-acid flavor. 20 cts. oz.; 75 cts. ½ lb.; $2.50 lb.

**Giant**—Large, hard, smooth, heavy and solid, and of a deep red color, the flesh is of finest quality, very solid and with few seeds. 20 cts. oz.; 50 cts. ½ lb.; $1.75 lb.

**Black Prince**—A very excellent shipping variety, quality the very best, fine for canning, fruit large, very smooth, and of dark tight color, flesh firm and solid. 20 cts. oz.; 50 cts. ½ lb.; $2.00 lb.

**Special Prices on Spinach in quantity.**

ABOVE PRICES INCLUDE POSTAGE. Persons purchasing Seeds at our counters, or who wish to pay their own express charges, may deduct 10 cents per pound from all Seed bought by the pound, if quoted at prepaid rates.
TOMATO, Continued.

Tranker's Favorite—It begins to ripen quite early and continues to bear productively until frost; has beautiful, large, solid, smooth, and almost heart-shaped fruit, which keeps well. 10 oz.; $1.00 lb.; $10.00 1000.

Imperial—An outstandingly early variety, adapting itself to the various soil, clay, and loam, and growing abundantly in different areas. 10 oz.; $1.00 lb.; $10.00 1000.

Golden Queen—The best yellow, medium early, smooth, round, very productive, excellent quality. 20 oz.; $1.00 lb.; $10.00 1000.

LIVINGSTON'S BEAUTY—Color very glossy crimson, grows in clusters of four or five fruits, large and solid. 20 oz.; $1.00 lb.; $10.00 1000.

LIVINGSTON'S FAVORITE—Productive, good flavor, few seeds, flesh solid, smooth and handsome. 20 oz.; $1.00 lb.; $10.00 1000.

LIVINGSTON'S PERFECTO—Early, large, smooth, and blood red color. 20 oz.; $1.00 lb.; $10.00 1000.

Early Acre—One of the earliest. The fruit is of medium size, perfectly round and smooth, and of a beautiful dark red, with a purplish tinge. 20 oz.; $1.00 lb.; $10.00 1000.

Mikado—Very large size, solid, free from core, and almost seedless. 20 oz.; $1.00 lb.; $10.00 1000.

Trophy—Fruit very large, solid, and heavy, excellent for main crop, round and smooth, 20 oz.; $1.00 lb.; $10.00 1000.

Cincinnati Purple—A valuable variety, especially adapted for canning and shipping. It is very large, color a dark purplish red, very productive and of rich flavor. 20 oz.; $1.00 lb.; $10.00 1000.

Yellow Pear Shape—Fine for preserves or pickling. 25 oz.; $1.00 lb.; $5.00 1000.

Cherry, Red and Yellow—For preserves and pickling. 25 oz.; $1.00 lb.; $5.00 1000.

TOBACCO, (Taback, Ger.)

The seed should be sown as early as possible after the danger of frost is over. Cover very lightly, and when the plants are about six inches high, transplant in rows six feet apart each way.

CONNECTICUT SEED LEAF—A long leaf, fine texture. 30 oz.; 70cts. 1lb.; $2.25 lb.

Havana—Pure Cuban grown seed. 20 oz.; 70 cts. $1 lb.; $2.25 lb.

White Burley—A variety largely grown for manufacture of fine cut and plug. 25 oz.; $1.50 lb.; $3.25 lb.

TURNP, (Rueben, Ger.)

Turnips for early use may be sown as soon as the ground opens in spring. For fall and winter use, sow the early sorts from July to the middle of August, the Ruta Bagans from June to the middle of July. They may be sown either broadcast or in drills. The best crops can be raised from drills, 18 inches apart, and the plants thinned to six inches asunder. One ounce to 150 feet of drill, 1 pound per acre in drills.

Purple Top (Rueben, Ger.)—The best extra early turnip, good quality. 10 oz.; 20 cts. 1 lb.; $5.00 lb.

Purple Top Flat Strap Leaf—The popular early variety, excellent for market or private gardens. 10 oz.; 20 cts. 1 lb.; $5.00 lb.

White Flat Strap Leaf—The best variety, for table or market use. 10 oz.; 20 cts. 1 lb.; $5.00 lb.

Long White, or Cow Horn—Grows quickly, partly above ground; very productive; flesh white. 20 oz.; 50 cts. 1 lb.; $1.50 lb.

RUTA BAGA or SWEDISH TURNP.

The Ruta Baga Turnip is extensively grown as a garden crop, the roots are close grained, very hard and will endure a considerable degree of cold without injury, excellent for the table in early spring.

Improved American Purple Top—a fine variety, grown both for table and for stock, flesh solid, fine quality, keeps well until summer. 20 oz.; $1.00 lb.; $10.00 1000.

Carter's Imperial—A purple top, yellow variety, productive, one of the best for field culture. 20 oz.; $1.50 lb.; $5.00 lb.

White Sweet German—A white, globular-shaped variety, superior for table use, of excellent quality, good keeper. 15 oz.; 20 cts. 1lb.; $1.00 lb.

HERB SEEDS.

As we grow these plants ourselves, they are all well packed and can be shipped fresh from our vols. or by express.

PRICES DO NOT INCLUDE PAYMENT BY MAIL OR EXPRESS.

We are Growers of Vegetable Plants and have them Fresh Every Day in the Season.
SELEcTED SEED POTATOEs, (Karatoff, Gern.)

We grow our Seed Potatoes in the best northern districts and expressly for seed purposes. As prices are liable to vary, we shall be pleased to give quotations upon application. Our supply has been secured from reliable growers, and include the following varieties. Prices subject to change.

Early Ohio—A seeling of the Early Rose, a week earlier, of excellent quality, tubers round and oblong in shape, flesh solid, cooks dry and mealy. 50 cts. peck; $1.00 bu; $3.00 bbl.

Early Rose—The leading variety for earliness and productiveness. 40 cts. peck; $1.00 bu; $2.50 bbl.

Beauty of Hebron—Ripens with the Early Rose, and equally as valuable as a market variety. 25 cts. peck; 50 cts. bu; $3.00 bbl.

Yellow and Red Jersey, Red Bermuda and Southern Queen—Write for prices. Ready for shipment about April 1st.

SEED SWEET POTATOES.

By express or freight at buyer’s expense. 10 cts. lb. extra if sent by Mail. The prices quoted are subject to change.

SEED CORN. (2 bu. Seamless Bags) 15 cts. each.

Cornucopia White Dent—This corn generally bears five good ears to the stock, has yielded 100 to 150 bushel per acre. (See page 90 for description.) 15 cts. ct.; 40 cts. gal.; 70 cts. peck; $2.65 per bu. 4 Extra Early Huron Dent Corn—Earliest Dent corn in the United States. Of a bright orange color, has good stalk and ear, small, red cob, long, deep grain, rank strong growth and wonderful productiveness. 35 cts. peck; $1.00 bu.

Champion White Pearl—The best white dent corn in cultivation, will ripen in 90 to 100 days, ears of good size, enormously productive. 35 cts. peck; $1.00 bu.

Hickory King—The largest grain, with the smallest cob ever introduced in a white corn, the stalks bear two good sized ears each, and will make more shelled corn to a given bulk of ears than any other variety. 40 cts. peck; $1.25 bu.

Jowm Gold Mine—Early yellow dent, ears are of good size and symmetrical, color a bright golden yellow, grain is very deep, cob small and therefore dries out very quickly as soon as ripe. 35 cts. peck; $1.00 bu.

Red Cob Ensilage—A southern type of large, white corn, with red cob, strong leafy stalks and short joints, a general favorite. 30 cts. peck; 75 cts. bu.

Ensilage Corn, White—30 cts. peck; 70 cts. bu.

Ensilage Corn, White—30 cts. peck; 70 cts. bu.

CHOICE SEED OATS. (Burlap Bags, 2 to 4 bu. 10 cts. each.)

Red Rust-Proof—This is the standard oats of the Southern States, yielding large crops when all other sorts were destroyed by rust. It is a large, heavy, reddish looking berry, very prolific. 40 cts. bu.

White, Black, also Mixed—Market price.

SEED WHEAT.

Longherry Red, Fulz, and other varieties—Market price. (See our Special Wheat List issued in June.)

Burbank’s—A white-skinned, medium early variety, with few eyes, flesh fine grained and of excellent flavor, producing a large crop of marketable potatoes. 55 cts. peck; 80 cts. bu; $2.50 bbl.

Chicago Market—Very popular, early, good quality and yields well. 40 cts. peck; $1.00 bu; $2.75 bbl.

White Star—Medium early, a very large cropper, fine, floury texture and delicious flavor, being unexcelled by any other variety. 55 cts. peck; 80 cts. bu; $2.50 bbl.

Late Beauty of Hebron—Remarkably productive, tubers oblong and of extra size, skin and flesh white, table qualities good, and keeps well. 50 cts. peck; 90 cts. bu; $2.50 bbl.

White Elephant—Late, large, enormously productive and of excellent flavor, splendid keeping qualities. 50 cts. peck; 90 cts. bu; $2.50 bbl.

ARTICHOKE—GIANT WHITE.

This makes an enormous yield, and a most nutritious and health-preserving hog and cattle feed. They also produce an immense quantity of tops, of which cattle, horses and mules are very fond, and which make excellent food when properly cured. Plant in rows four feet apart, dropping the tubers fifteen inches apart in the rows. It requires about three bushels to plant an acre. The tuber can be divided the same as potatoes. 50 cts. peck; $1.15 bu; $3.00 bbl.

SEEDS for the Farm.

Saves Fertilizer Bills and Improves the Condition of Soils Wherever Sown. Also Makes a Splendid and Nutritious Green Forage or Hay Crop.

SPRING WHEAT AND BARLEY.

Canada Spring, Northwestern Spring Wheat, Fall and Spring Barley—Market price.

BUCKWHEAT.

Japanese and Silver Hull—5 cts. lb.; $1.00 bu.

Common Gray—5 cts. lb.; 95c bu. Subject to market changes.

FIELD PEAS.

(2 Bushel Seamless Bags 15 Cents Each.)

Canada Field Peas—Valuable for Northern climates for cattle feeding, and when sown with oats are excellent hog feed. Used as feed for pigeons, etc., and for green soiling. 35 cts. peck; $1.50 bu.

SOUTHERN COW PEAS.

There is no surer or cheaper means of improving and increasing the productiveness of our soils than by sowing the Cow Pea. It makes an enormous growth, enabling the farmer to put plenty of nitrogenous vegetable matter into the soil at a small cost, and so very largely enables him to dispense with the use of nitrogenous fertilizers. The Cow Pea, to a greater extent than other leguminous crops, has the power to extract this costly nitrogen from the atmosphere and to store the same in the vines and roots so that if the crop is cut off, the land is still enriched and its condition improved. From 5 to 15 tons of green fodder per acre have been produced by the Cow Pea, and for hay they are most valuable, as they yield an immense quantity of feed of the best quality. For ensilage they are unsurpassed. Where it is desired to turn the whole crop under as a soil improver, it is better to do so after the vines are partly dead. A good picking of the dried peas can be made before plowing up if desired. Low Peas can be sown in May or June, at the rate of one to one and a half bushel per acre.

Wonderful, Black Eye and Brown Eye—Produce largest crop of peas. 60 cts. peck; $1.50 bu.

Clay and Black—Best for combination crop vines and peas. 50 cts. peck; $1.50 bu.

Whippoorwill—Best for peas, recommended for “hoggining down.” 50 cts. peck; $1.50 bu.

We are Headquarters for American Grown Grass Seeds.
SOJA BEAN.

The SOJA BEAN is fast taking the place of Clover in sections where the soil is not the most fertile, both for hay and fertilizing purposes.

Recommended as the best leguminous plant for soil restoring as it is adapted to ALL SOILS. It is a sure cropper. Unsurpassed for hay, claimed to be superior to Clover or Timothy. Plant in May, for it takes about ninety days to mature the hay and one hundred and twenty days to mature the seed. For hay sow about one bushel per acre either broadcast or drilled. Cut when in blossom. For seed sow in drills about twelve inches apart in the rows and have the rows about thirty inches apart. 50 cts. peck; $1.75 per bushel.

SUNFLOWER.

Mammoth Russian—May be grown to great advantage in waste ground, from early spring to the latter part of July. An excellent and cheap food for fowls. Plant four quarts to acre. 10 cts. lb.; $4.00 per 100 lbs.

BROOM CORN.

Improved Evergreen—The best for general cultivation, brush firm, of good length and bright green color. 10 cts. lb.; $2.50 bu.

Dwarf—Grows from 3 to 4 feet high, with straight brush. 10 cts. lb.; $2.50 bu.

California Golden—A strong growing variety much resembling the Evergreen, but longer brush, and a bright golden color when ripe. 10 cts. lb.; $2.50 bu.

SORGHUM OR SUGAR CANE.

Orange Cane—A strong grower, much more juicy than any other variety, the stalk is heavier and a little earlier than the Amber. 5 cts. lb.; $1.00 bu.

Amber Cane—This popular and well-known variety makes the finest quality of both sugar and syrup. 5 cts. lb.; $1.00 bu.

Imphee or Red Top—An old standard sort, and undoubtedly one of the best that has ever been introduced. 5 cts. lb.; $1.50 bu.

KAFFIR CORN.

A new variety of Sorghum, forming low, stocky and erect plants, producing from 2 to 4 heads of grain on each stalk, heads long and narrow, and filled with white grain which are greedily eaten by all farm animals, matures about the middle of October, resists drought like most Sorghums and furnishes excellent fodder, cultivate same as corn. 5 cts. lb.; $1.00 bu.

TEOSINTE.

In appearance somewhat resembles corn, but the leaves are much longer and broader, the stalk containing much saccharine matter, is very nutritious, it can be cut several times during the season, yielding enormously, if allowed to grow without cutting it will attain a height of 12 to 15 feet. Should not be planted until the soil is perfectly warm in the spring. Requires about 4 pounds seed per acre, plant in drills 5 feet apart and two or three seeds every twelve inches in drill. $1.00 lb.

DWARF ESSEX RAPE.

A forage plant of highest value. It can be sown in April for an early crop, and for fall crop in July, August and September, and still later further south. It is sown broadcast 6 lbs. to the acre, but is better drilled, in which case 3 lbs. to the acre will suffice. In a few weeks from the time of sowing, sheep, hogs or cattle can be turned on it; all reports agree that they gain weight faster on this than any other fodder, as it can be sown after other crops are off; the gain in fodder is secured at a nominal cost. Stockmen, Dairymen and Farmers have proved its value. 10 cts. lb.; $7.50 per 100 lbs.

PEACH PITS.

We have for years made the handling of peach pits a specialty, annually securing our stocks from districts entirely free from the yellows and are prepared to furnish the best. Prices furnished on application.

MOKCING BIRD FOOD.

For Thrushes, Mocking Birds, Black Birds, Nightingales and all soft billed birds. Directions for use on each package. 35 cts. per package.

MISCELLANEOUS, BIRD AND SUNLKY SEEDS.

PER LB.

PLEASE WRITE YOUR NAME AND P. O. ADDRESS DISTINCTLY.
Recleaned Grass and Clover Seeds.

THIS department has been our leading specialty for many years. While our Office and Retail Department building is one of the largest, best equipped and most conveniently situated in the State, still we have added a mammoth warehouse and cleaning department containing over 80,000 square feet of floor space, which, with the addition of the best improved machinery, makes our capacity about four times greater than before. Our facilities cannot be excelled.

We now run by power 12 improved combined cleaners and separators, also power corn shellers, etc.

As the prices are constantly changing, we offer them subject to market fluctuations. Where customers are in need of large quantities, we will be pleased to quote lowest market prices. All orders with cash filled at the lowest market price on day of receipt.

2 bushel Burlap Bags, 10 cents each.

10 cents per pound extra if sent by mail.

Emerald or City Park Lawn Grass Seed.
(See page 32 for full description.)

Kentucky Blue Grass.

This grass is almost universally known, and furnishes a moderate supply of pasture of the best quality. It varies in appearance and size according to soil, and in some parts of the country grows spontaneously. It stands drought very well, and if allowed to grow up in fall without grazing, makes a good winter pasture. Sow in fall or spring at the rate of two to three bushels per acre.

Extra Clean, 10 cts. lb.; 70 cts. bu.
Fancy, 20 cts. lb.; $1.40 bu.

Write for special prices on large lots.

Meadow Fescue.

This thrives in all soils, excellent for permanent pasture, starts early and is very productive; grows two to three feet high, and does well in almost any soil; makes fair hay. Sow in September or early in spring, at the rate of one to one and a half bushel per acre.

Extra Fine, 15 cts. lb.; $2.50 bu.
Second Grade, 10 cts. lb.; $1.75 bu.

Perennial Rye Grass.

(Imported English Blue Grass).

Is considered quite valuable, as it affords pasture quite early in the spring. The leaves are flat, long and glossy; the stalks rather short, seldom over 18 inches in length. The seeds are large, strong and make a vigorous young plant soon after sowing. The grass is quite variable in size and appearance. Sow early in spring at the rate of one to one and a half bushel per acre. 8 cts. lb.; $1.75 bu.

Italian Rye Grass—An early rapid grower, producing large leaves and succulent food. It does best in moist soils. Sow early in spring or fall about 25 lbs. per acre. 10 cts. lb.

Sheep's Fescue—Grows naturally on light, dry, sandy soils and mountain pastures. It is considered quite valuable as a mixture with other grasses for permanent early spring pasture. 15 cts. lb.

We are not only sellers, but one of the largest "cash" buyers in the State, of every variety of GRASS and FIELD SEEDS, Fancy Seed Grain, etc. Would be pleased to receive Samples of any Fancy Stock you may have to offer.

Orchard Grass.

One of the very best grasses in cultivation, and rapidly coming in favor. If cut just at the coming into bloom (as it always should be) a good second crop will follow and sometimes even a third. Is recommended for sowing with red clover as they come into flower at the same time. Orchard Grass is one of the earliest grasses, yields immense crops, and makes the best of hay; it endures considerable shade, and is much used for sowing in orchards. 1½ to 2 bushels of seed will sow an acre. 10 to 15 cts. lb.; $1.25 to $2.00 bu.

Red Top.

This perennial native grass produces rather late in the season a reddish purple, or greenish panicle of flowers. It thrives best on low land, where it cuts a good crop of rather light hay of fair quality. It is very suitable for pastures on low ground. Sow in September or early spring at the rate of 1 to 2 bu. per acre.

Prime, 8 cts. lb.; 70 cts. bu.
Choice, 10 cts. lb.; 80 cts. bu.
Fancy 15 cts. lb.; $1.00 per 100 lbs.

Timothy—This grass stands at the head for meadows, particularly for hay that is to be baled for market, if cut at the proper time, which is; when in full bloom. I prefer to seed it in the fall—September—if it is seasonable, and if, by any reason, there is a partial failure, go over the ground in spring. Sow one fourth to one-half bushel per acre. Market price.

Sweet Vernal—Is very fragrant, especially when bruised. For a mixture with other grasses for pasture it is quite valuable, as it starts early in spring and grows until late in the fall. For hay its chief merit is its fragrant odor. It is a vegetable condiment rather than a grass of nutritive value. 20 cts. lb.

Bermuda Grass—A very valuable grass for the south, but will not endure frost. $1.00 lb.
GRASS SEEDS, Continued.

Johnson Grass—A perennial, a rapid grower, long, cane-like roots, the leaf stalk and panicle of this grass resembling those of other Sorginums. Sow at the rate of one bushel per acre, and should be sown in August or September to secure a good crop the following year. 15 cts. lb.

Tall Meadow Oat Grass—This is a perennial grass, has broad, flat leaves and grows about 3 feet high, has an abundance of long, fibrous roots penetrating deeply in the soil enabling it to withstand drought and cold. Sow at the rate of two bushels per acre, in early fall, on poor pastures. 20 cts. lb.

Wood Meadow Grass—This grass, as its name implies, i found naturally in shady woods, and is well adapted to growing under trees, but will also on exposed places and on light, thin soil. 35 cts. lb.

German or Golden Millet—True Southern grown.—It has been fully established that German Millet grown in the Northern and Western States becomes deteriorated, and soon resembles Fox Tail in quality and yield. This is due to the fact that German Millet is a native of a warm climate. Southern grown seed is worth double that of Northern or Western grown, if you want a good crop of hay. We are prepared at all times to fill orders at market prices.

Hungarian Grass—This grass resembles the millet, it is of fine growth, and makes an excellent hay. Market price.

Special Grass Mixtures.

We are prepared to furnish seeds adapted to all soils and all situations and for all purposes. Our best mixture is made entirely with choice, reclenched seeds, while in the second quality we use the same seeds, but without reclencing and will be equal to the qualities usually to be had on the market. Our mixtures will have a uniform weight of 16 lb. to the bushel. Quantity to be used per acre, 1½ to 2 bushels, and half this quantity for renovating. In ordering always state the soil and position on which you wish to use it. 2 bushel seamless bags, 15c. each. No extra charge for burlap bags for 5 bushels or more.

Special Prices on Large Quantities.

When ready to purchase Grass Seeds, send us list of varieties and quantity of each wanted, and will name you Special Quotations.

PROMPT AND CAREFUL ATTENTION is given to all orders either large or small. Remember, we fill orders of any amount, but when ordering, if possible, make orders not less than 25c, as when orders are smaller than this it is generally at a loss to us.

CLOVERS.

Red Clover—In ordering always state quality desired, otherwise will send the best. The grades of the market are Good, Prime and Choice. Market price.

Sapling, Mammoth, Large, English or Pea Vine Clover—Trifolium Pratense Perenne. Compared with common red clover, its flowers, foliage and stems are of a darker color and its seed is the product of the flowers of the first crop, while the common red clover is the product of the flowers of the second crop. It is valuable when sown with other grasses for mixed hay, as it ripens later than the common red clover and about the time that timothy, orchard and other grasses ripen, thereby making the hay a much better quality. The best for soilng purposes. Market price.

Sainfoin or Esparsette—A perennial, the duration of good crops being about 8 years, grows 2 to 3 feet high, flowers in spikes from June to August of a beautiful pink or flesh color, on long foot-stalks. 15 cts. lb.

White Dutch Clover—Trifolium Repens. Grows naturally in pastures in a great variety of soils and situations and is an indispensable requisition in all parks and lawns. 20c. lb.

Alfalfa Clover—The most valuable forage plant. It thrives best on a sandy loan, the richer the better, and in such will produce several crops every season. In the driest and most sultry weather, when every blade of grass withers, Alfalfa is as fresh and green as in the spring, as its roots go down from 10 to 20 feet to the moisture of the ground. Although a prodigious yielder, it does not exhaust the soil, but rather improves the ground by the decay of its long roots, and converts it into rich ground, full of vegetable matter. The seed may be sown early in the spring. Sow (drills) fifteen pounds per acre. 15 cts. lb.

Alsike or Swedish Clover—So called from being intermediate in its appearance between the red and white clovers, possessing qualities common to both, being productive, sweet and permanent. Will grow well on very poor soil. Should be used in mixtures of grasses and clovers for pasture, and will improve the quality of the hay if mixed with the meadow grasses. It is also esteemed highly for pasturage for bees. 15 cts. lb.
CLOVER SEED, Continued.

Scarlet or Crimson Clover—Scarlet Clover is an annual and should be sown in August, September or October. It germinates quickly, grows very rapidly through the fall and winter, blossoms about May 1st. This clover can be sown after crops have been removed from the ground. In this way it will prove of inestimable value in holding the valuable nitrates in the soil that are otherwise washed out of the bare ground, furnishes fall, winter and spring pasture and enriches and stores up plant food for the next crop. *Sow at the rate of ten or fifteen pounds per acre, covering with harrow or cultivator* Nothing like it for sowing on ground after potatoes are harvested. 10 cts. lb.; 75 cts. 10 lbs.; $7.00 100 lbs.

Bokhara Clover—A large plant quite valuable for soilng, producing several crops in a season, its branches bear numerous white flowers, which are sweet and fragrant, excellent pasture for bees. 30 cts. lb.

If larger quantities of the above are wanted, write for Special Prices.

FERTILIZERS.

Our experience of twenty-five years in the business as manufacturers' agent of high grade fertilizers and our facilities for obtaining material of the first-class, enables us to offer the highest grade of goods to be found anywhere, and when we go into a neighborhood, all our customers are our reference after the first crop. The following goods are in great demand.

Game Guano—For all grain crops, and especially good for spring crops and vegetables, owing to its ammonia and potash. This grade is best adapted for wheat seeded on corn land, also for grass following wheat. 25 cts. 5 lbs.; 75 cts. 25 lbs.; $1.25 50 lbs.; $2.00 100 lbs.; $3.50 200 lb. bag or barrel; $28.00 ton.

Jadoo Fibre—Is a new growing substance for plants of all kinds. It was invented by Col. Thompson, of the Royal Army and Fellow of the Royal Horticultural Society of England, and it is highly recommended by gardening authorities there. It suits all kinds of plants, is only half as heavy as earth and cleaner to handle. It increases the size and brilliancy of flowers. Seeds germinate and cuttings root in it quicker than in earth. Owing to its spongy nature, it retains water much longer than earth. Plants transplanted in Jadoo Fibre do not flag, even if in full bloom. From experiments in our nursery we recommend mixing Jadoo Fibre with about ¾ to ½ good loam to give best results. 80 cts. 5 lbs.; 50 cts. 10 lbs.; $1.10 25 lbs.; bag of about 125 lbs., $2.00 per 100 lbs.

Canada Hardwood Unleached Ashes—Effectually destroys the moss and sweetens the ground. Send for descriptive circular. 75 cts. 50 lbs.; $1.25 100 lbs.; $2.00 200 lbs.

FERTILIZERS, Continued.

Lawn Fertilizer or Dressing—To produce a rich, luxuriant and lasting growth of beautiful dark-green grass, use our lawn dressing. It is quick in action, its effect being seen immediately after the first rain. It acts energetically on the unfolding leaves, goes directly to the roots, stimulates them to activity and causes the grass to thicken. A firm growth follows, which remains green, luxuriant and velvety for the whole season. Stable manure is very unsightly, gives an unpleasant odor, disfigures the lawn, and contains weeds and other foreign seeds. The dressing should be applied in autumn or spring, and sown broadcast on a damp day or just before a rain. 40 cts. 10 lbs.; $1.00 30 lbs.; $1.50 50 lbs.; $2.50 100 lbs.

Sheep Manure—This is a pure, natural manure, and a most nutritious food for plants. Its effect is immediate, more lasting and healthful than guano or any other manure. It is the best of all manures for mixing with the soil for greenhouse plants. It makes the richest, safest and quickest liquid manure, rivaling guano, without any deleterious effects. Nothing equals it for general use on flower beds, or for the vegetable garden. No other fertilizer produces such a marked and permanent effect upon lawns. No raking off required. No seeds of foul weeds in it. No offensive odor. It is clean to handle. Absolutely safe to use in any quantity or in any manner. For lawns use at the rate of from 300 to 600 pounds per acre. For pot plants mix one part of sheep manure to six parts of soil. For use in the vegetable garden spread over the surface and dig in. Being soluble, it readily makes a safe liquid manure (1 pound to 5 gallons of water per day can be safely used.) 10 cts. lb.; 25 cts. 5 lbs.; 50 cts. 12 lbs.; 75 cts. 25 lbs.; $2.50 100 lbs.

Pure Bone Meal—25 cts. 5 lbs.; 40 cts. 10 lbs.; $1.00 30 lbs.; $1.50 50 lbs.; $2.50 100 lbs.; $3.75 bag of 200 lbs.

Nitrate of Soda—5 cts. lb.; $3.50 100 lbs.

Kainit, Potash Salts—Use 200 to 400 pounds per acre. For small grain drill in, for cultivated crops plow under. Single bag, $2.50 bag; 5 bags or more, $2.40 bag; $21.00 ton.

Cotton Seed Meal Fertilizer—$1.25 100 lb. bag; $20.00 ton.

Fertilizer for Pot Plants—The Excelsior. A great success. Makes plants grow and bloom luxuriantly. It is used by dissolving a teaspoonful to a pint of water and applying to the soil every few weeks. It starts the plants at once into a healthy and vigorous growth and abundant bloom. 15 cts. package about 8 oz.; 25 cts. two packages; 10 cts. package extra by mail, postpaid; $1.20 dozen.

**In addition to the above first-class goods, we have PURE RAW BONE MEAL AND ACIDULATED BONE. Also other Fertilizers on application.**

MOSS.

Sphagnum—For packing and growing orchids, etc. 10 cts. lb.; $1.50 bale.

Green, Sheet—40 cts. bale.

Emerald or City Park Lawn Grass will make a good lawn from seed the first season.
SPECIALTIES.

We do not call them Novelties, as nine times out of ten the Vegetable and Flower Seeds that are catalogued as Novelties are new varieties and have not been thoroughly tested. These Specialties of ours, though comparatively new, have been tested on our own grounds, and we know them to be as represented.

VEGETABLE SEEDS.

BEANS.

Stringless Green Pod Bush.

This bean is the first and only stringless green pod dwarf bean in cultivation. It surpasses all others in crispness, tenderness and flavor, and is the most prolific bean grown. The pods are 4½ to 6½ inches long, nearly round, slightly curved and of the best quality. They remain long in edible condition and are never stringy. 20 ct. pt.; 35 ct. qt.

Kentucky Wonder, Pole.

A snap bean of wonderful growth, pods grow in clusters, are nearly a foot long, round and pulpy. This is the favorite corn bean in this section. 20 ct. pt.; 30 ct. qt.

Black Kentucky Wonder.

Surpasses the old Kentucky Wonder in yield and quality. 25 ct. pt.; 35 ct. qt.

BEET.

Crosby's Egyptian.

The Cincinnati market gardeners prefer this beet to any other on account of its earliness and uniform size. It has no superior. 10 ct. oz.; 25 ct. ¼ lb.; 70 ct. lb.

CAULIFLOWER.

Extra Early Erfurt Dwarf.

This variety has for the past 5 or 6 years led the list as the surest header of any cauliflower. We get our seed direct from the best grower in Denmark and can recommend it to all for the market or private garden. 20 ct. pkt.; 80 cts. ¼ oz.; $2.75 oz.

CABBAGE.

Louisville Early Drumhead.

Originated in this market and is now the principal market variety and cannot be surpassed. Early heads of very large size and very solid, the best and surest heading for all purposes and will stand the entire summer without bursting. 25 ct. oz.; 65 ct. ¼ lb.; $2.25 lb.

Danish Ball Head.

The hardest heading, surest heading, most popular late cabbage ever introduced. The weight of a head trimmed for market is fully one-fourth more than that of any other variety of a similar size. Destined to become one of the standard market varieties. Give this variety a trial. 25 ct. oz.; 75 ct. ¼ lb.; $2.50 lb.

All varieties Vegetable Seed sent postpaid, except Peas, Beans and Corn, add 10 ct. pt., 15 ct. qt, if sent by mail.

The Celebrated 5-Eared Field Corn.

CORNUCOPIA WHITE DENT.

It is the strongest grower ever seen. Has yielded 75 to 150 bushels to the acre. Every stock bears five good ears, except in case of severe draught, when some stocks will mature only three or four ears. It is a White Dent, not a flint corn. Stock limited. It will certainly pay you to try this grand corn. Matures in about 110 days. 15 ct. qt.; 40 ct. gal.; 70 ct. peck; $2.25 bu.

SWEET CORN.

Zig Zag Evergreen.

This variety of evergreen sweet corn is one of the best for private use, market gardeners and canners. It is of extra quality, very sweet and juicy in the green state. It ripens about the same time as Stowell's Evergreen and is superior to that well known variety in sweetness and flavor. Wherever known it commands a higher price in the market than any other sort. 10 ct. pt.; 20 ct. qt.; 80 ct. peck.

Country Gentleman.

The ears are of good size and produced in great abundance, bearing three to four good ears to a stalk. When we consider that ordinary sweet corn produces only one or two good ears to the stalk, the superiority of this variety will be quickly seen. The cob is very small, giving great depth to the kernels, which are of pearly whiteness. But the great merit of the Country Gentleman corn is its delicious quality. It is, without doubt, the sweetest and most tender of all sweet corn, and at the same time with ears of good size. 10 ct. pt.; 20 ct. qt.; 65 ct. peck.

LETTUCE.

Cincinnati Market.

One of the best forcing varieties known and a favorite with all gardeners. Large pale green leaves, exceedingly crisp and tender and a shy seeder. 15 ct. oz.; 50 ct. ¼ lb.

Deacon or Nonpatriel.

This is a fine market variety, crimped, curled and well-formed heads, withstands the heat of summer well. 15 ct. oz.; 35 ct. ¼ lb.; $1.00 lb.

California Cream Butter.

This variety forms round, solid heads of good size, medium early and one of the best summer sorts. 15 ct. oz.; 35 ct. ¼ lb.; $1.00 lb.
MUSK MELON.
Rocky Ford.

We have thoroughly tested this melon on our own grounds and find that nothing we can say of it does it full justice. It seems as if Dame Nature, taking the good parts of every variety and putting them into a small, neat package, has made to order a melon that pleases everyone. 15 cts. oz.; 30 cts. ¼ lb.; 75 cts. lb.

WATER MELON.
Sweet Heart.

We do not recommend this melon to shippers because of its thin rind, but for the private garden it cannot be excelled. The flesh is solid, and at the same time the most tender and juicy of all melons. 10 cts. oz.; 25 cts. lb.; 75 cts. lb.

Triumph.
The Triumph is very early, very large, very prolific, deliciously sweet, of finest flavor, in fact, the finest watermelon in the United States. The farmer who values his melon patch and looks forward to the good times in July and August, cannot afford to do without the Triumph. 10 cts. oz.; 80 cts. ¼ lb.; 90 cts. lb.

PEAS.
New Eclipse.

This is an extra early green wrinkled pea, the pods resembling the American Wonder in size and shape of the pod. It is earlier than the Alaska and the most productive of any green wrinkled pea. We unhesitatingly recommend it as the best early pea for the private garden. Height of vine 2 feet. 15 cts. pt.; 25 cts. qt. (Add 15 cts. qt. if sent by mail.)

First and Best.
The earliest pea grown. Our strain of this pea is now so well known that we need hardly say anything further about it. Will only say that in the past growing season we have used the same care as heretofore and our customers can be sure of getting the genuine First and Best. 10½ pt.; 20c qt.; $1.00 peck. (Add 15 cts. qt. if sent by mail.)

Telephone.
No pea of recent introduction has gained so rapidly in popularity as the Telephone, thus showing it has great merit which gardeners appreciate. Medium late, 3½ feet high. 15 cts. pt.; 25 cts. qt.; $1.50 peck. (Add 15 cts. qt. if sent by mail.)

RADISH.
Cincinnati Market.

This splendid variety of radish originated here and has been grown for a number of years by a few of our largest market gardeners. They guarded the seed as though it was so much gold, and it was only after several years that we succeeded in getting a small quantity. Since then we have grown it ourselves and have been most careful to keep it up to its original high standard. It has a very short top, and is, considering all its points, the best long red radish grown and a money maker for the market gardener. 10 cts. oz.; 25 cts. ¼ lb.; 80 cts. lb.

TOMATO.
Buckeye State.

A handsome, large sized, smooth tomato. It averages at least one-half larger than the beauty, is more prolific and abundant in fruitage, than the standard sorts now in cultivation. It is unquestionably the heaviest, cropper known and is smooth and uniform in size. The tomatoes are borne in immense clusters of four to eight fruits and occasionally ten large fruits have been found on a single cluster. In solidity and meatiness it has no equal, while in luscious quality none surpass it. The color is much the same as Beauty, but a darker and richer shade, and this together with its very large size and clear cut outlines, makes it very showy and striking when displayed for sale. 20 cts. oz.; 60 cts. ¼ lb.

Trucker's Favorite.

It is one of the largest tomatoes grown, and is most regular in shape and size. Color, purplish red, very solid, firm flesh, a good keeper, and not subject to rot or crack on the vines. It is an excellent shipper, and sold in market at better prices than any other variety offered at the same time. Ripens evenly to the stem, is a strong, healthy grower, not subject to rust or blight, is an enormous cropper, and produces until the vines are killed by frost, holding its size exceedingly well until the last picking. The quality is of the very best, and for cooking and slicing purposes it cannot be excelled. It is in every way a most desirable variety for market gardeners and hence the name Truckers Favorite. 30 cts. oz.; $1.00 ¼ lb.

LETTUCE MIXTURE.

All sorts. It cannot fail to please. Will give a succession of good lettuce throughout the season. A fine contrast to our Radish Mixture, when planted along side of it. 15 cts. oz.; 30 cts. ¼ lb.; $1.00 lb.

RADISH MIXTURE.

All sorts. This is especially adapted to the wants of those having only a small garden, as it contains all of the leading varieties, and will give a succession of fine radishes. Try a package. It will please you. 10 cts. oz.; 20 cts. ¼ lb.; 50 cts. lb.

Seeds and Plants are now taken by leading Express Companies at a reduction of 20 per cent. from the regular rates for merchandise.
**Flower Seeds and Bulbs.**

**PANSY.**

**J. C. McC.'s Mixture.**

This strain is saved from the finest flowers of one of the best collections of pansies in the world. The plants are compact and of robust growth, and if cultivated properly will give an abundance of very large flowers of unsurpassed brilliancy of color and distinct markings. Florists and amateurs desiring charming "show" flowers, should not neglect this strain, as it is the result of many years' careful selection and hybridization, and embraces all the attractive features that tend to make the pansy the people's flower.

| 20 cts. pkt. | $1.00 ½ oz. |

---

**SWEET PEAS.**

Nothing in the flowering line is easier to raise and no flower will give you a greater variety of color nor profusion of bloom than the Sweet Pea. They should be planted as soon after the 1st of February as the weather will permit. Plant in rows 6 feet apart, 2 inches apart in the rows, and about 3 inches deep. Many times when they do not do well it is because they are planted too thick in the rows. Sweet Peas should be picked every day. If you let them go to seed they will stop blooming.

"Old Glory" Mixture.

The three best up-to-date varieties of red, white and blue sweet peas mixed in equal proportion. 10 cts. oz.; 20 cts. ½ lb.; 50 cts. lb.

**J. C. McC.'s Mixture.**

This mixture contains all the best named large flowering varieties and novelties, and is undoubtedly the finest and most complete mixture ever offered, being put up by ourselves from named varieties only, in the proper proportion of colors. 10 cts. oz.; 25 cts. ½ lb.; 65 cts. lb.

---

**SPECIAL SWEET PEA OFFER.**

To anyone enclosing $1.00 with order, we will mail one ounce each of any 22 varieties our best named Sweet Peas. In taking advantage of this offer you can obtain the finest assortment at a very small cost. (See page 22 for full list.)

---

**FLOWERING BULBS.**

Our prices include postage on single bulbs and by the dozen, except where otherwise noted. Bulbs quoted by the 100 are not sent prepaid.

**Caladium Esculentum, (Elephant's Ear.)**

One of the most effective plants in cultivation for the flower border, or for planting out upon the lawn. It will grow in any good garden soil, and is of the easiest culture. It should be planted where it will obtain plenty of water and a rich compost. foliage light green.

**CROZY'S EVER-BLOOMING CANNAS.**

These varieties have become famous for the immense size and color of their flowers, the graceful and highly ornamental foliage, together with their dwarf habit of growth, are fast becoming most important plants for decoration.

**Madam Crozy**—Dazzling crimson scarlet, bordered with golden yellow, foliage bright green. 4 feet. 10 cts. each; 75 cts. doz.

**Crozy's Dwarf Mixed Varieties**—5 cts. each; 50 cts. doz. (For full list of varieties see page 23.)

---

**TUBEROSES.**

One of the most delightfully fragrant and beautiful of the summer flowering bulbs. By skilful management a succession of flowers may be obtained all the year round. For early flowers they can be started in February or March in the greenhouse or hot-bed; and for a succession they can be planted at intervals as late as August. For flowering in the open border, plant about the 1st of May.

**Excelsior Pearl**—Much superior to the ordinary Double Pearl Tuberose. This variety is characterized by its short, robust stem and long spikes of flowers, which are more double and twice as large as those of the old sort. 4c each; 35c doz.; $1.75 per 100.

**Dwarf Pearl**—Good flowering. 3c each; 25c doz.; $1.25 per 100.

**Double Tall**—Extra large bulbs. 4c each; 35c doz.; $1.50 per 100.

---

**Grass Seeds.**

**GRASS SEEDS, CLOVER, ETC.**

In our cleaning department we are continually adding some improved cleaner, and are always right up to the times. This is our great specialty, and we are confident that no firm excels us in this department. If you want Clean Seeds, give us your order and we will always try to give you satisfaction.

We are large cash buyers of high grade Grass and Field Seeds and Fancy Seed Grain. If you have any to sell, mail us sample and state quantity you can offer.

**Special Grass Seed Mixtures.**

For pasture or farm.

- Per bushel (16 lbs.) $1.50
- In large quantities, per bushel (16 lbs.) 1.25

If it is GOOD QUALITY WANTED, we can save you money on anything for Garden or Farm. If you do not see what you want, write for it.

**Emerald or City Park Lawn Grass Seed.**

Is composed exclusively of the very best varieties of grass, such as long experience has shown to be best adapted to produce a thick, heavy, carpet-like lawn. In this mixture use only the very best reeleaned seed, and can guarantee that for purity and germination, it is equal to any variety sold under any name. One of the greatest troubles in obtaining a good lawn is to get it free from weeds. These, while not always in the seeds, but quite often in the ground or come from the use of stable manure, are, nevertheless, always objectionable. Our customers can rely, in buying Our Emerald Lawn Grass Seed, on it being the very purest seed obtainable and entirely free from weeds or foreign seed. For a new lawn sow 4 to 5 bushels to the acre. For renovating sow 2 to 4 bushels to the acre. 15 cts. ½ lb.; 25 cts. 1 lb.; 50 cts. 2 lbs.; $1.00 5 lbs.; $3.00 16 lbs. (1 bushel), (5 cts. per ½ lb. and 10 cts. per lb. extra if sent by mail.)
**MISCELLANEOUS.**

**PRICES SUBJECT TO CHANGE.**

**KAFFIR CORN.**

One of the best things offered of late years for a forage plant. The heads contain small seeds which make an excellent flour. They are greedily eaten by horses and cattle, and make splendid food for poultry, fed either in grain or ground and cooked. The foliage and stocks make excellent forage. Cultivate the same as common corn, requiring 4 or 5 pounds of seed per acre. By mail, postpaid, 20 cts. lbs.; 50 cts. 3 lbs. By freight or express, 5 cts. lb.; 40 cts. 10 lbs.; $1.60 50 lbs.; $1.50 100 lbs.

**SOJA BEAN.**

The Soja Bean is fast taking the place of clover in sections where the soil is not the most fertile, both for hay and fertilizing purposes. Recommended as one of the best leguminous plant for soil restoring, as it is adapted to all soils. It is a sure cropper. Unsurpassed for hay, claimed to be superior to clover or timothy. Plant in May, for it takes about 90 days to mature the hay and 120 days to mature the seed. For hay sow about 1 bushel per acre either broadcast or drilled. Cultivate in fall; can be sown in blossom. For seed sow in drills about 12 inches apart in the rows and have the rows about 30 inches apart. $1.75 bu.; 10 bushel lots or over, $1.65 bu.

**CANADA FIELD PEAS.**

Valuable in Northern climates for cattle feeding, and when sown with oats are excellent hog food. Used as food for pigeons, etc., and for green soiling. Postpaid, 25 cts. qt. By express or freight, 10 cts. qt.; 40 cts. peck; $1.40 bu.

**SOUTHERN COW PEAS.**

GREAT SOIL RENOVATOR.

There is no surer or cheaper means of improving and increasing the productiveness of our soils than by sowing the Cow Pea. It makes an enormous growth, enabling the farmer to put plenty of nitrogenous vegetable matter into the soil at a small cost, and so very largely enables him to dispense with the use of nitrogenous fertilizers. The Cow Pea to a greater extent than other leguminous crops, has the power to extract this costly nitrogen from the atmosphere and to store the same in the vines and roots so that if the crop is cut off, the land is still enriched and its condition improved. From 5 to 9 tons of green fodder per acre have been produced by the Cow Pea. To grow for hay they are most valuable, as they yield an immense quantity of feed of the best quality. The bacon made from hogs fed on dry peas is much sweeter and more solid, and the fat will not run out in cooking nearly so much as when fed on corn. For ensilage they are unsurpassed. Where it is desired to turn the whole crop under, as a soil improver, it is better to do so after the vines are partly dead. A good picking of the dried peas can be made before plowing under, if desired. Cow Peas can be sown in May or June, at the rate of 1 to 1½ bushels per acre.

10 cts. qt.; 50 cts. peck; $1.50 bu.

**ARTICHOKE ROOTS—Giant White.**

The great food for hogs. Grown from tubers the same as potatoes and are the finest food that can be raised for hogs and sheep, as they prefer them to anything. This, together with their wonderful yield, 500 to 1000 bushels to the acre, makes them by far the cheapest as well as most valuable feed for this class of stock. They need not be dug in the fall simply turn in the hogs and they will root them up very quickly. Of course they can be dug and fed later in the season if you so desire. No farmer who has any hogs or sheep can afford to be without the Giant White Artichoke, which is the heaviest yielder and best variety grown. By mail, postpaid, 20 cts. lb.; $1.00 6 lbs. By express or freight at purchaser's expense, 50 cts. peck; $1.15 bu.; $3.00 bbl. (enough for 1 acre).

**CLOVER—Alfalfa, or Lucerne.**

This clover claims to bear the palm as a forage plant, coming earliest in spring and remaining latest in fall. It delights in plenty of sun, it being a very hardy child of the sun, and must be sown at the rate of 10 to 15 pounds of seed per acre on well drained, well pulverized, deep soil, after danger of freezing is over, and prefers sand or gravel subsoil. Wet subsoil is fatal to the plant. Roots from 3 to 15 feet deep, and when well established lasts for years. 2 to 3 crops a year can be cut. 15 cts. lb. (25 cts. lb. by mail) 60 lbs. or over at 10 cts. lb.

**RAPE—Dwarf Essex.**

This plant is extensively grown for forage, especially for sheep, and for green manure, for which purpose there is perhaps no better plant adapted where a quick, rank growth is desired. Farmers who raise much stock and desire to get young cattle, sheep or lambs into favorable condition to be sold advantageously in the fall, can do it most cheaply by growing this Rape. Prepare the ground as for turnips and sow in June or July, with a turnip drill, in rows 2½ feet apart, at the rate of 3 lbs. of seed per acre, or broadcast at rate of 6 lbs. to the acre. Our stock is the true Essex Dwarf, and not the worthless annual. Postpaid, 10 cts. ½ lb.; 25 cts. lb. By freight or express, $1.00 10 lbs.; $4.00 50 lbs.; $7.50 100 lbs.

**DOUBLE TUBE LIGHTNING SPRAYER.**

This is a perfect machine, well made, with glass reservoir made from the pattern of Mason fruit jar, which can easily be replaced in case of accident. $1.00 each.

Our "Louisville Cabbage" is the Market Gardener's Favorite.
TESTED JMC RELIABLE

SELECTED FLOWER SEEDS

GENERAL LIST.

WE TAKE PLEASURE in presenting to you our revised Flower Seed List, embracing only the best and most popular varieties. Our Flower Seed trade has increased very rapidly the last few years, which is very gratifying to us, as it speaks well for the quality of the seed we send out. Look it over carefully and add at least one or two packets to your vegetable seed order. It will pay you well. We do not sell old seeds; neither do we mix old seeds with new; every seed is new, fresh and clean. Everything is arranged in alphabetical order.

Annuals grow from the seed, bloom and perish in one season. Biennials generally bloom the first and second year and then die. Perennials bloom the second year and every year thereafter; some perishing after three or four years, others continue indefinitely. Some few Perennials, if started early, bloom the first year.

Full Cultural Directions on all Flower Seed Packets.

All Flower Seed Sent Free by Mail on Receipt of Price.

ORDER BY NUMBER, AND THUS AVOID WRITING THE NAME IN FULL.

We take the GREATEST CARE in TESTING EVERY VARIETY of Vegetable & Flower Seed offered by us, and know they should GROW WELL under favorable conditions.

All of our seeds have been thoroughly tested.
Early Louisville Cabbage (Original Variety) Sure Header.
PANSY.

This lovely flower a favorite with every one, is too well known to need any description. It will flower in the middle of summer if planted where it is somewhat shaded from the hot sun, and especially if furnished with a good supply of water, but in most any situation will give fine flowers in spring.

**PANSY.**

Hardy Perennial

168. Bugnot, Cassier and Odier Strains—Superb mixture of unsurpassed quality.... 25c

169. Cassier’s Giant—The flowers of immense size, of good substance and fine form, while the plants are of neat, compact growth.... 25c

“**WILD GARDEN**" FLOWER SEEDS.

- All lovers of flowers who are fond of novelties in the way of flower gardens, and cannot give much time in the way of cultivation, will find this mixture the desirable thing if sown en masse, as it will produce a continuous bloom of flowers of every hue, and you will have a mass of floriferous splendor that will last all summer: this mixture is composed of the most free and showy annuals, suitable for a wild garden of flowers, . . . 25c oz.; 15 cts. oz.; .5 oz.; 5c

**SPECIAL NOTICE.** We include a packet of Wild Garden Flower Seed with every order of Flower or Vegetable Seed in packets for 25 cts. or over.
Summer Flowering Bulbs and Roots.

The summer flowering bulbs and roots are inexpensive, very easily grown, require scarcely any care and produce some of the most showy and beautiful of all summer and autumn flowers. Before hard frost the bulbs must be taken up and stored away in some secure from frost until spring.

At the prices quoted on single bulbs or by the dozen, we send either by express or mail prepaid, by the 100 or 1000 at purchaser's expense. No less than 6 will be sent at the dozen, nor less than 50 at the 100 rate.

**DAHLIAS.**

The Dahlia is one of the showiest of our autumn flowers. Commencing to flower in August they are in a perfect blaze of bloom until stopped by frost in late autumn. They delight in a deep, rich soil; should be planted 3½ to 4 feet apart, and be tied to heavy stakes to prevent strong winds from breaking them down.

We are one of the Largest Recleners of Seeds in the U. S. Our facilities unsurpassed.
STOCK AND POULTRY SUPPLIES.

Mixed Grain and Seed For Poultry.
Have prepared a mixture of about ten different sorts, among these are buckwheat, Hungarian, millet, wheat, cracked corn, oyster shell, etc. Best food in the market. While present stock lasts, price only 50 cts. bu.

International Poultry Food.
Absolutely pure and highly concentrated. One small feed of this has more medicinal effect than a very large one of many others. Each box contains about 100 feeds. 25c box.

International Stock Food.
Cures and prevents disease in horses, cattle, hogs, sheep, etc. Insures health and rapid growth for all young stock. A peculiar combination of medicinal ingredients makes this a superior and safe food for stock. 25c and 50 cts. box.

Haven’s Climax Condition Powder.
For horses, cattle, swine or poultry. Will prevent and cure gapes and poultry cholera. Libera 25c package, 50 cts. by mail, 40 cts.

Ground Oyster Shells.
15 c. 5 lbs.; 25 cts. 10 lbs.; $1.00 100 lbs.; $1.75 200 lbs.

Pure Ground Bone.
For poultry and cattle. 5 cts. lb.; $3.00 100 lbs.

Sunflower Seed.
Good egg producer. 5 cts. lb.; $4.00 100 lbs.

Pigeon Peas.
For feeding pigeons. 40 cts. peck; $1.20 bu.

INSECTICIDES.

Hammond’s Grape Dust.
It is a preparation to kill the destructive mildew that strikes the grape vine, affecting leaves, fruit and stems in unfavorable seasons, also for like use upon any other plant or trees affected with mold, mildew or rust mites. 10c lb.; 35c 5 lbs.; 60c 10 lbs.; $5.00 100 lbs. By mail, 25c lb.

Slug Shot.
Kills caterpillars, currant, gooseberry and cabbage worms, potato, melon, cucumber and squash bugs, rose slugs, rose lice. 10c 1 lb. pkgs.; 25c 5 lb. pkgs.; 50c 10 lb. pkgs. Put up in barrels of 250 lbs., in bulk 4c lb. By mail, 15c lb. extra.

Fossil Shot. (White Powdered.)
For destroying rose slugs, currant worms, etc. 10 cts. 1/2 lb.; 20 cts. 1 lb.; 30 cts. lb. By mail, 15 cts. lb. extra.

Flour of Tobacco and Sulphur.
Will prevent and cure mildew on grape vines and rose bushes. Will destroy the green and black fly, grubs, cutworms, lice, mealy bug and the red spider. May be applied in powder or liquid form. If put on in powder, the foliage should be wet; if in liquid, the foliage should be dry. 15c lb.; 35c 2 lbs.; 50c 5 lbs. By mail, 15c lb. extra.

Rock Salt.
For horses and cattle. 2 cts. lb.; $1.25 100 lbs.

Drinking Fountain for Poultry.
Can be filled easily. Water always clean. Chickens can not get drowned in it. 25 cts. 1/2 gallon; 35 cts. 1 gallon.

Sassafras or Medicated Nest Eggs.
For setting and laying hens. 5 cts. each; 10 cts. doz.; 3 cts. each or 25 cts. doz. extra by mail.

Cotton Seed Meal.
The most economical article for feeding stock now known. Directions for feeding—Milch cows and fattening cattle, mix with other feed, beginning for each animal with one pint at a feed, increasing gradually for a week or ten days, to two quarts at each feed. Fattening hogs one quart. Horses one-half pint every other day. Sheep one-half pint. Price subject to change. $1.25 100 lb. bag.; 5 bag lots, $1.25 per bag. $24.00 ton. Cotton Seed Hulls, in bags, $8.00 ton.

Linseed or Oil Cake Meal. (Old process.)
It is a great flesh former, milk and butter producer, and on fair test will prove to be an economical cattle food. Prices subject to change. $1.45 100 lb. bag.; $27.50 ton.

Fir Tree Oil.
Soluble insecticide effectively destroying all kinds of pests to which plants are subject. Equally effective on animals, and is harmless to the skin and hands when used as a wash. Full directions with each bottle. 40c 1/2 pt.; 75c pt.; $1.25 qt. Liquid insecticides can not be sent by mail.

Flour of Sulphur.
For the prevention of mildew. 10 cts. 1 lb.; 70 cts. 10 lbs. By mail, 25 cts. lb.

Tobacco Stems.
Used for fumigating plants to kill insects. 10 cts. 1 lb.; 50 cts. 10 lbs.; $1.00 bbl.; $3.00 bale about 250 lbs. By mail, 15 cts. lb. extra.

Persian Insect Powder. (Pyrethrum.)
For destroying roaches, ants, fleas and other insects. 15 cts. 1/4 lb.; 55 cts. lb. By mail, 15 cts. lb. extra.

Whale Oil Soap.
Makes an elegant wash for trees and plants, kills insects and eggs on the bark. 15c 1 lb. (by mail, 30c); 60c 5 lbs.

Paris Green.

Make your home cheerful and comfortable by planting a few of our beautiful flowering bulbs.
SEED & SOWERS & AND & SUNDRIES.

“New Idea” Broadcast Seed Sower.
The Lightest Running CRANK SEEDER
Ever Offered for the Money
For Sowing Wheat, Oats, Rye, Rice, Flax, Grass Seed, Clover Seed, etc.,
in fact any kind of seed broadcast. No careful, economizing farmer
will continue to sow his seeds by hand (the old style) when he can get
one of these machines at our reduced prices. They will save their cost
almost daily in saving of seeds, to say nothing about saving of time
and more even distribution, which will have a great effect on the
crop. They will sow from 4 to 6 acres per hour at a common walking gait.

Price, $1.50

The “New Idea” is indestructible. All iron and steel, except 2 handle
tips and the bag. With solid one-piece frame there is no chance for bind-
ing or giving away of parts. Only 1 cog wheel, 4 inches in diameter,
working in a worm shaft that gives the nearest approach to a ball-bearing
movement possible to construct. In the old style geared seeders there are
4 noisy cog wheels to make friction and wear out. The lower and principal
bearing runs on a point. This machine runs so easily and smoothly
that the weight of the handle will run the machine. Equipped with
agitator and accurate seed gauge. The “New Idea” is new and novel
throughout and such a machine as any up-to-date farmer will be proud of.

“PERFECTION” SEED SOWER.
This is a geared machine and works with a crank which
seems to be the favorite; is strongly built of the best material.
It sows seeds and grain perfectly even and in any desired
amount. It will with proper care last a life time. Only
needs a trial to prove its value. Price, $1.25.

Improved Switzerland Seed Sower.
Will sow at least three times as fast as by hand and with
more ease, being very light, weighing less than one pound.
The method of operation consists in a succession of semi-
circular swings from right to left and vice versa. It will
sow timothy 18 ft. wide, clover 30 ft. wide. The best sower
in the world for the money. Price, $1.00; 6 for $5.00.

CAHOON SEED SOWER.
The difficulty in sowing is entirely overcome by the use
of the Cahoon Broadcast Seed Sower which can be handled
with ease by an entirely inexperienced person and will sow
much more evenly than can be sown by hand. Price, $3.50.

Come and see our establishment and be convinced that we are “Headquarters for Seed.”
Lenox Knapsack Sprayer.

22 QUARTS.
For Garden, Field, Grape and Small Fruit Culture.
One man does the work of twelve and need not stoop down. Spray as fast as the wind. No waste whatever. Spray stops by releasing the pressure of the thumb, no machinery to get out of order. Simple as your milk can. Has an agitator on the left side to stir the liquid. Costs less than all others. Never out of order. Adjustable to man or boy. To spray trees and vines turn nozzle up. We recommend it to be the best and cheapest on the market. Price, $3.00 each.
Extra Tube, Rubber bulb and rose to work with both hands. $1.50.

NOVELTY SPRAY PUMP.
The Best Pump
For the Money.
All parts of this pump are proof against the effects of spraying fluid. The bottom is brass, with brass strainer. It can be used for a thousand different purposes about the house, such as sprinkling flowers, gardens, or lawns, washing windows, walls, buggies, etc., and spraying trees or shrubbery of any kind. It will throw a steady stream 40 or 60 feet with ease and is provided with a sufficient amount of air chamber, both above and below the water, to continue throwing a stream from the nozzle one-fourth minute after ceasing to operate. Every family in the cities who do not have the advantage of waterworks, will find it a profitable investment, while no doubt is left in the minds of those people who have trees, shrubbery, etc., to take care of that the novelty exactly meets their desires. Price $3.00 each.

INSECT POWDER BELLOWS.
The best made for Slug Shot, Helichore, Insect Powder, etc. 50c., 75c., $1.00 and $1.25 each.

"When to Spray and What to use." See Page 32.
"Planet Jr." Farm and Garden Tools.

Space will not permit our showing and describing all of the "Planet Jr." tools, but we will send a fully illustrated catalogue free for the asking to any who desire it. "Planet Jr." goods are standard machines; the best, and you can rely on getting bottom prices from us on any of the "Planet Jr." goods.

"PLANET JR." SEEDER
For Rows and Hills

"Planet Jr." No. 3 Hill Dropping Seed Drill.
A seeder that does not drop in hills is fast becoming a thing of the past. Why? Because all crops that are to be grown from seed and thinned to a regular stand, should be planted in hills at just the distance apart the plants are desired, for in drilling, unless the seed is sown unnecessarily thick, there will not always be a plant at the proper spot, and the crop is therefore irregular. This machine not only saves in a continuous row, but also drops in hills, 4, 6, 8, 12, and 20 inches apart. We can heartily recommend it.

Price $11.00.

"PLANET JR." No. 17
Single Wheel Hoe, Cultivator and Plow.

This Single Wheel Hoe has an 11 inch wheel with broad face, and a conveniently arranged, and very valuable set of tools. It is very light, strong and easy running. Has adjustable handles and frame, and is the most perfect Wheel Hoe for market gardeners and private places. Frame changes in height, and the wheel to the other side of the frame, to allow of hoeing both sides of the row at one passage. Price $4.75.

"PLANET JR." No. 8
HORSE HOE AND CULTIVATOR.

Probably no other cultivating machine is so widely known as the "Planet Jr." No. 8 Horse Hoe and Cultivator. It is so strongly built as to stand incredible strain, yet it is light and easily handled. Every part of the tool is perfected to make it valuable to the intelligent farmer, who knows the best is always the cheapest.

Price No. 8 Horse Hoe, $10.00; No. 7 Horse Hoe, $9.50; No. 9 Horse Hoe, $8.50; No. 4 Horse Hoe, $7.25.

"PLANET JR." No. 4
Combined Hill Dropping Seeder and Single Wheel Hoe.

This is exactly the same style of seeder as the No. 3 "Planet Jr." Hill Drpper. It is smaller in capacity, though still of good size, holding two quarts. It drops in hills the same as the No. 3, and in drills any thickness, handling the smallest paper of seeds perfectly. It is simple, durable and very light running. Thrown out of gear instantly and the flow of seed cut off, by simply raising the handles. The drill is detached and the tool frame substituted by removing but one bolt. It then becomes one of the most admirable Single Wheel Hoes of the "Planet Jr." family.

Price $12.00. As a Drill, only $8.50.

"PLANET JR." No. 12
Double Wheel Hoe, Cultivator and Plow.

Price Complete, $7.25.

This tool combines in itself the good points of its predecessors, with valuable new ideas. It has 12 inch wheels, which can be set at four different distances apart, the frame is malleable, with ample room for tool adjustment, and can be set at three different heights. The handles are adjustable, and the arch is of stiff steel, unusually high. The design of the frame is new, allowing the changes of the tools to be made without removal of the nuts from the standards. The machine has a large equipment, four pairs of tools in all, and the amount of work possible with this machine is almost incredible, covering the large range of wheel hoe work both in the garden and on the farm, and has our unqualified endorsement.

Price, Complete, $7.25.

"PLANET JR." Harrow and Cultivator

This tool has rapidly grown into favor with farmers, market gardeners and strawberry growers. It has a high frame, and the chisel shaped teeth cut an inch wide, each. Hand levers regulate width and depth, while in motion, and the pulverizer prepares the ground capacitally for the Seed Drill or for plant setting, and controls the depth of the rear teeth. It contracts to 15 inches and expands to 22 inches. Cultivates without throwing earth upon the plants, and the smooth, round threath teeth turn strawberry runners without injuring them.

Price plain, $6.25; with wheel, $8.25; complete, $10.00.

For a Splendid Collection of Pansies or Sweet Peas try J. Chas. McCullough's Mixtures.
**LAWN SUPPLIES.**

EVERYTHING NECESSARY TO MAKE A PERFECT LAWN.

**STYLE “M”**

Genuine Philadelphia Lawn Mower.

We warrant them to run easy and to be as durable and to be capable of cutting as high grass as any lawn mower made.

**SPECIAL NET PRICES.**

The “Chief” Horse Lawn Mower.

Can be operated readily by hand.

**30 Inch Cut. 10 Inch Traction Wheels.**

This mower is used in our principal parks and cemeteries. The draft with the horse is the same as when operated with handle. Positively no tipping up with rear of the mower.

**PRICE, Complete, f.o.b. Philadelphia—$18.00.**

We can also supply the Philadelphia and Excelsior Horse Lawn Mowers. Prices on application.

We also have a job lot of NEW but old style lawn mowers in good condition, that we offer as long as present stock lasts at $2.50 each.

**SUPERIOR LAWN MOWER OIL.**

This is a handy can holding half a pint, filled with fine oil manufactured expressly for lawn mowers, bicycles, etc., 20c per can.

**Lawn Roller.**

In two sections, the best. Weight about 250 pounds. Special price $12.00

**Roller, Two Horse.**

Two sections, 8 feet long. Weight can be increased by loading. Price $25.00

**Grass Catcher.**

Fits any lawn mower. Gathers all the grass. Leaves the lawn smooth and velvety. It can be adjusted to any machine in a moment. The catcher is made of heavy duck. In ordering give the size of mower on which you intend to use the catcher. 75c each.

**EMERALD OR CITY PARK LAWN GRASS SEED.**

In this mixture use only the very best recleamed seed, and guarantee that for purity and germination, it is equal to any variety sold under any name. Our customers can rely, in buying Emerald lawn grass seed, on its being the very purest seed obtainable and entirely free from weeds or foreign seed. For a new lawn sow 4 to 5 bushels to the acre. For renovating, sow 2 to 3 bushels to the acre. 15 cts. ½ lb; 25 cts. lb; 2 lbs. 50 cts.; 5 lbs. $1.00; 10 lbs. (1 bu.) $3.00; (6c per ½ lb. and 10c per lb. extra if sent by mail).

**Lawn Fertilizer or Dressing.**

To produce a rich, luxuriant, and lasting growth of beautiful dark-green grass, use lawn dressing. It is quick in action, its effect being seen immediately after the first rain. The dressing should be applied in winter or spring, and sown broadcast on a damp day, or just before a rain. 6 lbs. 25c; 30 lbs. $1.00; 50 lbs. $1.50; 100 lbs. $2.50.

**UNION CYPRUS FLOWER TUBS.**

An excellent new tub, cheap, neat and durable. Made from 1 inch cypress, with iron handles and feet, 3 iron hoops and 2 coats of green paint.

No. 1—13½ inch diameter, 11½ inches high, 60 cts. each.
No. 2—14½ inch diameter, 14 inches high, 90 cts. each.
No. 3—16 inch diameter, 15 inches high, $1.20 each.

The new Planet, Jr., Hill Dropping Drill is the Most Complete Machine in its line ever offered.
NORTHERN GROWN SEED POTATOES.
In this line we are certainly headquarters for this section. We probably do not list as many varieties as some firms, but it is because so many are really not suited to our soil. What we do list are among the best and cheapest articles you can procure. (See page 12 for full list.)

Southern Cow or Stock Peas.
As a fertilizer, the demand for Cow or Stock Peas has increased considerably and we recommend them as being one of the best and cheapest articles you can procure. (See page 12.)
Whipoorwill, Black Eye, Brown Eye, Clay and Wonderful.
Per bu. $1.50; 10 bu. lots $1.40 per bu. Subject to change.

Dwarf Essex Rape for Sheep.
Dwarf Essex Rape is now established as one of the best forage plants for fattening sheep in the fall, the fat giving properties being almost twice that of clover hay. Sow twelve pounds per acre broadcast or five pounds in drills fifteen inches apart.
Price post paid 20c. per lb; by freight or express at the expense of purchaser, 10c. per lb; 25 lbs. for $2.00; 100 lbs. $7.50.

A Good Lawn Mower.
Yes, we have them, and at a reasonable price. There are cheaper lawn mowers on the market than those we offer, but none near as good at the price. A cheap mower is one thing, and a good one another. Ours are good, and with a little care will last a life time. If your old mower is dull or out of repair, we can fix it for you, or exchange for a new mower at the difference in value.

GRASS SEEDS, CLOVER, ETC.
In our cleaning department we are continually adding some improved cleaner, and are always right up to the times. This is our great specialty, and we are confident that no firm excels us in this department. If you want Clean Seeds, give us your order and we will always try to give you satisfaction.
We are large cash buyers of high grade Grass and Field Seeds and Fancy Seed Grain. If you have any to sell, mail us sample and state quantity you can offer.

Emerald or City Park Lawn Grass Seed.
Is composed exclusively of the very best varieties of grass, such as long experience has shown to be best adapted to produce a thick, heavy, carpet-like lawn. In this mixture use only the very best reclassed seed, and can guarantee that for purity and germination, it is equal to any variety sold under any name. One of the greatest troubles in obtaining a good lawn is to get it free from weeds. These, while not always in the seeds, but often in the ground or come from the use of stable manure, are, nevertheless, always objectionable. Our customers can rely, in buying Our Emerald Lawn Grass Seed, on it being the very purest seed obtainable and entirely free from weeds or foreign seed. For a new lawn sow 4 to 5 bushels to the acre. For renovating sow 2 to 3 bushels to the acre. 15 cts. $1/2 lb; 25 cts. lb; 50 cts. 2 lbs.; $1.00 5 lbs.; $8.00 16 lbs. (1 bushel). (5 cts. per ½ lb; and 10 cts. per lb; extra if sent by mail.)

The Wonderful Five-eared Field Corn.
CORNUCOPIA White Dent. This corn normally bears five good ears to the stalk. Takes a severe drought to lessen the number. Has yielded 75 to 150 bushels per acre. Large, sappy stalk, 10 to 12 feet tall. Matures in about 110 days. It is the strongest grower ever seen, and is a White Dent, not a Flint Corn. It will certainly pay you to try this grand corn. We are headquarters for same. Stock limited, so would advise you to order early. Prices as follows: 15 cts. per qt.; 40 cts. per gal.; 70 cts. per pk.; $2.25 per bu. (15 cts. per quart extra by mail.)

Mixed Grain and Seed for Poultry.
We have prepared a mixture of about ten different sorts, among these are Buckwheat, Hungarian Millet, Wheat, Cracked Corn, Oyster Shell, etc. Best food in the market. Will make your hens lay. The variety does the work. While present stock lasts, price per bushel, only 50 cts.
Write for special prices on large quantities

First-class Seeds, of equal quality, cannot be bought anywhere for less money, while, from thousands of trials made every year, we know that J. C. McC's SEEDS are the BEST that grow!

WHEN TO SPRAY AND WHAT TO USE.

The following brief directions for the spraying of fruits and vegetables have been compiled as the result of several years' experimenting with different materials, and it is believed they can be followed without injury to the crops, and with profit to the owner. It will pay to spray all fruit plants in the spring with copper sulphate solution, and the second and third applications, as recommended, can generally be made with profit. Never spray with arsenites while the trees are in blossom, as the bees will be poisoned; they are necessary to fertilize the flowers.

Explanation. Whenever an asterisk [*] is used, it cautions against spraying with poisons while the plants are in blossom: a dagger [†] indicates that there is danger of making an application within 8 weeks of the time the fruit is to be used as food. While the number of recommendations will be found desirable, in seasons when the fungii are less troublesome a smaller number may often suffice.

---

**FORMULAS**

**BORDEAUX MIXTURE.**

- Copper sulphate, 4 lbs.; Quick lime, 4 lbs.; Paris green (for leaf eating insects), 4 oz.; Water [one barrel], 40-60 gal.

To prevent potato rot, 4 lbs. of copper sulphate is used instead of.

**KEROSENE EMULSION.**

For insects which eat foliage.

- Kerosene [coal oil], 3 gals.; Rain water, 1 gal.; Soap 1/2 lb. To be diluted before use with 8 parts of water.

**PARIS GREEN AND WATER.**

For insects which eat foliage.

- Paris green, 1 lb.; Lime [fresh], 1 lb.; Water, 200 gals.

**SPECIAL NOTES.**

- Bordeaux sulphate, as is necessary.

- For removal of old canes, cut new ones in and spray with Bordeaux mixture.

- Aphids: Kerosene emulsion or Fir Tree Oil.
Our Celebrated Emerald or City Park Lawn Grass Seed.

This seed is equal or superior to any lawn grass seed offered under any name.

\[
\begin{align*}
\frac{1}{2} \text{ lb.} & = 15 \text{ cts.;} \\
1 \text{ lb.} & = 25 \text{ cts.;} \\
2 \text{ lbs.} & = 50 \text{ cts.;} \\
5 \text{ lbs.} & = $1.00; \\
16 \text{ lbs.} & = $3.00. \\
\end{align*}
\]

(5 cts. \(\frac{1}{2}\) lb. and 10 cts. per lb. extra if sent by mail.)

(This lawn made first year from our seed.)

This lawn is composed exclusively of the very best varieties of grasses, such as long experience has shown to be best adapted to produce a thick, heavy, carpet-like lawn. In this mixture is only the very best, carefully selected, and can guarantee that for purity and uniformity it is equal to any variety sold under any name. One of the greatest troubles in obtaining a good lawn is to get it free from weeds. These weeds, while not always in the seeds, but quite often in the ground, or come from the use of manure, or from the ground not being the very purest seed obtainable and entirely free from weeds. To make the lawn sow 1 to 3 lbs. to the acre. For renovating sow 1 to 2 lbs. to the acre.

**Directions for the Lawn.**

First get the ground in the desired shape and grade. Drain it where necessary, and remove all rocks, stones, etc., so as to have an even and smooth surface. To secure the best results use our seed liberally per acre for new lawns being about the right quantity. (1 lb. to about 300 square feet.) 1 to 2 lb. for renovating. When to sow depends upon the part of three or four inches before cutting, as the growth is retarded by too early cutting. After this it should be cut with a lawn mower every 10 days, and rolled whenever the ground is soft enough for the roller to make an impression.
